PREFACE.

THE following "Elements of Syriac Grammar" are intended for the assistance of those Students in Hebrew, who are desirous of extending their studies to the Syriac Language. This is easily accomplished in consequence of the close affinity, which exists between the two languages both in their structure as well as in the multitude of words which they possess in common. A small portion only of time and labour is quite sufficient for the Hebrew scholar to obtain a moderate knowledge of Syriac. It is indeed so nearly allied to Hebrew and especially to Chaldee, that after he has read the Chaldee parts of the Bible, he may at once proceed to the reading of Syriac, and it is important that he should not neglect the acquisition of it, since the advantages to be derived will amply repay him for whatever trouble he may bestow upon the subject. There is no necessity to give a minute statement of these advantages; but it may be mentioned that the Syriac Language supplies one source of valuable information for the criticism of the

Hebrew Bible. By an examination of a Hebrew word as it is used in this language, essential service has been rendered in elucidating many difficult and important passages of Holy Writ, and it has been the constant practice of commentators to have recourse to Syriac, whenever the Text of the Old Testament fails to establish satisfactorily the signification of a word. In such case every person allows that a reference to Syriac is one of the legitimate means to be employed in determining the sense of a passage, and although this language is inferior to Arabic in the extent and variety of its literature; it is nevertheless superior as regards its much more intimate connection with the original language of the Bible.

But the great claim as it appears to me, which the Syriac has on the attention of that class of persons, for whose use this book is intended, consists in the Syriac New Testament. The high antiquity of this Version and its use in the early established Syriac Church stamp an importance on it, which can be assigned to no other, and if to these circumstances be added another, that the Syriac Language is so nearly the same as that spoken in Palestine in the first age of Christianity, that by many persons it has been termed the vernacular language of our Lord, it must be allowed that the Syriac New Testament possesses a value inferior only

to that which belongs to the Original. Michaelis devoted his great talents to the study of Syriac and to an examination of the Syriac Version. In his Introduction to the New Testament, he has endeavoured to fix the period when that Version was made, and after bringing forward many cogent arguments in favour of its high antiquity has inferred that it must have existed, either at the end of the first or the beginning of the second century. This great age and its frequent deviation from the common reading in passages of importance must recommend the use of it to every critic, and the truth is that it has been more used than all other sources of critical assistance together.

From these remarks it will obviously appear desirable that the Hebrew scholar should acquire a knowledge of the Syriac Testament; especially as that knowledge can be so easily obtained. To facilitate the acquirement of it has been my chief inducement in sending forth this elementary Grammar to the public. I have been also further encouraged to do it from the growing attention there is at the present time to Hebrew and oriental studies in this Country. It is to be wished that this attention will continue to increase, and that before the lapse of many years some acquaintance with the Hebrew Bible will be generally sought after by the ministers of our Church. There may be some persons

who will not join in this wish, and I am aware that it has been urged by many, who are indifferent or are opposed to the cultivation of Hebrew learning, that no new doctrines can be discovered from the Hebrew Bible, and that therefore the English Translation will supply every want. To this it may be replied that the Greek Testament contains no doctrines which are not to be found in our English Version; that this Version is not inferior to that of the Old Testament in the fidelity of its execution, and that therefore the same reason may be brought forward for the abandonment of the original.

It is one of the Articles of our Church that “the Old Testament is not contrary to the New; for both in the Old and New Testament everlasting life is offered to mankind by Christ.” I do not see therefore on what principle the Hebrew Bible is not to be deemed as important for all purposes of divinity as the Greek Testament: indeed no arguments can be advanced in favour of a knowledge of the latter, which will not most certainly apply with equal force for a knowledge of the former. But although the Hebrew Bible will not disclose to its reader any new doctrines of religion; there is something else which it will do. It will teach him the primary signification of words, and thus present to him many expressions with additional force and

enable him to form his own opinion and put his own interpretation on many particular passages. This is a benefit which is to be acquired from the Hebrew Bible, and which will be found of immense value to the Minister in his public Exposition of the Scriptures. It may be also observed that if the candidate for Holy Orders were encouraged to enter on the study of Hebrew, the circumstance could not fail to be beneficial to him in no ordinary degree. It would compel him to read the Scriptures more frequently, to examine important parts more critically, and would consequently make him more familiar with the contents of the Bible than would otherwise be the case. That pursuit which obliges the Minister, or the candidate for the ministry, to study the Scriptures cannot be adopted without advantage. It will exercise an influence over all the powers of his mind and the whole tenour of his life. It will fix his thoughts on those matters which pertain to his profession, and it may serve as the beginning and be made the basis of a sound course of Theological reading. In the early periods of the reformation, when the great questions at issue between the contending parties could be decided only by a reference to the Scriptures in their original tongues, Hebrew and oriental literature were zealously pursued, and there arose in those times men, who have rendered their names imperishable as much by their profound skill in Hebrew learning, as by the part which

they sustained in emancipating their country from Popish tyranny. That was the time when oriental literature flourished most in England, and it was because of the great proficiency which our venerable reformers possessed in this branch of study, that with the aid of God's Holy Spirit, they were enabled to dispel the superstitions of Papacy.

There is also another point not to be forgotten in estimating the importance of the subject now under consideration. In these days many laudable attempts are made to convert the Jews to Christianity. These attempts deserve every encouragement; for it must be confessed that of all the people who are sitting in darkness, none possess a greater claim on our exertions; none can appeal more strongly to our sense of duty and our feelings of gratitude; than the descendants of that people, to whom were entrusted for so many ages "the oracles of God," and from whom sprung the first disciples and teachers of our faith. But whilst we ought to take an interest in the eternal welfare of our Jewish brethren and to use every effort to bring them within the pale of the Christian Church; it may at the same time be safely affirmed that the subscribers to the Jews' Society need never to look for any great measure of success; unless the persons, who are employed to conduct its operations are ac-

quainted with the Hebrew language. Every person who has had any experience in the feelings and opinions of Jews must be aware of the prejudice which they possess in favour of Hebrew. The Bible they read in Hebrew; indeed they never like to read any religious book unless it is in Hebrew; and it is certain that they are not unskilful in perverting the Text of Scripture and rendering it subservient to their own peculiar system. It is therefore incumbent on all, who are engaged in the conversion of the Jews to meet this prejudice by informing themselves on the Hebrew Language. It is highly necessary that they should be competent to prove to the Jews from their own Hebrew Scriptures that Christ in whose death we rest our hope of salvation is indeed he of whom Moses and the Prophets have written. Neither will it be enough that they are acquainted with the Hebrew Bible. The religion of modern Jews is learned principally from the Talmud and the writings of their Rabbis. The Jewish Teachers, like the Priests of the Romish church, exercise a spiritual domination over their flocks, and it is from the oral law that they propound their dogmas and derive their authority. The Jews are ever ready to give a blind adhesion to these dogmas and to submit to the yoke which is imposed upon them. Whoever, therefore, wishes to combat effectually the errors

of Rabbinism, must make the study of the Talmud his business for many years.

An objection has been frequently made to Hebrew and its family of languages that they are barren in their literature, and that a knowledge of the Bible is the only information to be obtained from this department of study. Such is assuredly not the fact. The works written in these languages, which have been transmitted to us, are not deficient either in the quantity or variety of subjects on which they treat, nor in the interest and importance which these subjects possess. There are the Chaldee Targums,* or Paraphrases of the Bible, some of which are more ancient than the Christian era. In them we read the Interpretation, which the pious Jews of old put on many important passages involving predictions of the character and offices of the Messiah, and which cannot fail to afford great satisfaction to the Christian Student. There are also the modern Jewish commentaries. They are very voluminous and although they contain much of mysticism and folly; it cannot be denied that many of them abound with remarks of

* I beg leave to recommend a Chaldee Grammar and Chrestomathy, published a short time since by Mr Riggs, a Pupil of Professor Stuart in America. The Grammar is chiefly a Translation of Winer's and is admirably adapted to promote the study of the Chaldee Targums.

great philological value. In Syriac we have the New Testament of which mention has been already made; besides a great quantity of ecclesiastical and historical writings. It must also be especially borne in mind that a very great portion of the history, science and literature of the middle ages is locked up in the Syriac and Arabic languages.

In the execution of this book, I have consulted the Grammars, which have been published in Germany during the last fifty or sixty years; as well as others of a more ancient date. I have endeavoured to be simple in the arrangement, to account for the vowel changes and the various inflexions of words, by the operation of a very few principles, and to exhibit in a concise form the general structure of the language. How far I have succeeded in these matters I leave for others to decide. At the end is given an analysis of the 2nd. Chapter of St. John's Gospel, which I trust will be found useful to the Student in the early stages of his progress.

It was my expectation that this Grammar would have made its appearance about a year ago. The delay has been occasioned by the new Syriac Types at the University Press, which were not obtained so soon as I expected. I take this opportunity of men-

tioning the circumstance in order to express my thanks to the Syndics for their kindness in procuring them, and also to offer an apology for the time which has elapsed since the first announcement of the intended publication.

§. 1. THE Syrians in common with many other Eastern nations, read from the right-hand to the left, and have the same number of letters, which are all consonants, as the Hebrews.

The following Table exhibits their forms, names, powers and numerical values.

Care must be taken to distinguish between the following letters, which have nearly the same figure, and differ chiefly in their magnitude.

	⊃	?	e	⊂	Δ	∪
1	⊃	;	o	⊂	Δ	∪
	⊂					

One letter is joined to another by a small horizontal line drawn from its extremity; as, σ in σΔ. The exceptions to this are ; ⊂ ; and Δ, which when joined to another letter assume the forms , ⊂ ; and Δ.

All the letters except the eight | ; σ o 1 ; Δ may be joined to the following letter of the word. The nine letters ⊃ ∪ ⊂ ⊂ ⊂ ⊂ ⊂ ⊂ ⊂ terminating a word, receive a slight additional stroke, and are written ⊃ ∪ ⊂ ⊂ ⊂ ⊂ ⊂ ⊂ ⊂. The five ⊃ Δ ∪ ⊂ Δ alter their figure at the end of a word, and are called finals. They retain their usual power, but assume the forms ∪, ∪, ∪, ∪ or ∪ ∪.

The following compound characters are frequently used.

Olaph-Lomad	∪	for	Δ
Lomad-Olaph	∪		Δ
Lomad-Lomad	∪		Δ.

As Letters of the same organ are frequently changed for one another in the process of derivation; Grammarians have divided the whole Alphabet into classes according to the organ of speech by which they are enounced.

Gutturals	ا	ح	ع	ق	
Linguals	ب	ط	ظ	د	ذ
Palatals	ك	ج	خ	س	ش
Dentals	ف	ث	ظ	ز	ر
Labials	ل	م	ن	و	ي

The consonants ا ح ط will frequently become quiescent, i.e. lose their power as consonants; as is the case with the Hebrew אדחי.

2. Vowels.

There are five vowels, which are written, either above or below the consonants with which they are connected and are pronounced after them. There are two sets, one derived from the Greek vowels, and the other expressed by different positions of one or two points. The following Table exhibits their names, powers and forms:

	Names.	Power.	Figure.		
			Syr.	Greek.	
ا	Pethocho	a	ا	α	Alpha
ا	Revotso	e	ا	ε	Epsilon
ا	Chevocho	i	ا	ι	Iota
ا	Zekofo	o	ا	ο	Omicron
ا	Etsotso	u	ا	υ	Upsilon.

The points of the vowel Zekofo may coalesce with the point of the letter ز, as, ز ا *Roh-tin*.

The vowel Etsotso is always accompanied with و except in the two words ا *cul*, ا *M'tul*.

When no vowel is expressed, then as in the Hebrew, a Sheva (or one of its substitutes) will be implied and read accordingly.

Vowels may be divided into two classes: *pure*, i. e. those which complete their syllables: and *impure*, i. e. those which do not complete the syllable without the addition of a terminating consonant.

Pure vowels are

$\begin{array}{c} \dot{\text{—}} \\ \ddot{\text{—}} \\ \text{—} \end{array}$	}	When followed by a quiescent } \circ or —	{	as מָלֶפֶחַ <i>Ma-leph.</i> אֶתְכֵלֶם <i>Ethekel.</i> לִי <i>li.</i>
$\text{—} \cdot$	as	כְּתוּבָה		<i>K'tho-bo.</i>
\circ	as	נֶפֶק		<i>Ne-puk.</i>

Impure Vowels are

$\text{—} \cdot$	as in	כָּד <i>cad.</i>	אָדָמוֹ <i>äda-mo.</i>
$\ddot{\text{—}}$	מֵן	<i>Men.</i>
$\text{—} \cdot$	אִדוֹתוֹ	<i>i-do-tho.</i>

Final syllables are often, as in Hebrew, anomalously long, on account perhaps of the accent; as, אִפִּין *A-pin*, where $\text{—} \cdot$ occurs with two consonants, so also אִלֵּן , אִלֵּיךְ , אִלֵּיךְ , &c.

The Greek vowels are more frequently used in modern books.

3. *Diphthongs.*

There are several diphthongs made by the letters Vau and Yud, which losing their own powers coalesce with the preceding vowel and form one syllable.

Vau makes four diphthongs *au*, *eu*, *iu*, *ou*.

The first occurs in the beginning, middle and end of words and is produced by the vowel γ preceding \circ ; as, אָוֶל^{γ} *au-kel, he fed*, צֹוֹם^{γ} *Tsau-mo, the fast*, זֶה^{γ} *ho-nau, this is*.

The second *eu*, by the vowel γ preceding ע ; as, $\text{אֶשְׁתֵּי}^{\gamma}$, *Esh-teu, I will drink it*.

The third *iu* by a *chevotso* preceding ע ; as, $\text{שֶׁנְּשִׁיד}^{\gamma}$, *N'shad-riu, he will send him*.

The fourth *ou* is when \circ is preceded by another \circ with γ ; as, שׁוֹדוֹ^{γ} *Shou-do-yo, promise*.

Yud makes two diphthongs, *ai* and *oi*: *ai* by γ before א ; as, גְּלַיִת^{γ} *G'laith, thou hast revealed*: *oi* is effected by \circ before א ; as, הוֹי^{γ} *hoi, she*.

4. Properties and Changes of Consonants.

Consonants possess various properties and undergo certain changes arising from the influence of vowels; or other causes, which we proceed to mention.

The letters כ ס צ when they are not pronounced; but rest in the sound of the vowel on the preceding letter are called *quiescent*.

Olaph final rests in \circ or γ ; as, אִישׁ^{γ} *the man*, אִישִׁים^{γ} *the men*: except the four verbs הָיָה^{γ} *he was impure*, נָחַם^{γ} *he was comforted*, $\text{הִלְכִּים}^{\gamma}$ *he polluted*, $\text{הִלְבִּינֵהוּ}^{\gamma}$ *he was decorated*.

Olaph in the middle of a word rests in γ or ע ; as, אֲכַל^{γ} *to eat*, אֲמַר^{γ} *to say*. Yud is sometimes

changed into Olaph quiescent in ׀ ; as, בְּעָלָם to *beget*, for בְּעָלָם .

Yud usually rests in ׀ or ׀ ; as, בְּעָלָם *he begun*, אֵל *is*, בְּ *but*.

Vau deprived of a vowel is for the most part quiescent in ׀ ; as, וַיָּקִימוּ *rise*, וַיָּקִימוּ *day*. It is also used as the fulcrum or, as it is technically termed, the *mater lectionis* of this vowel; as, וַיָּקִימוּ .

In foreign words Vau is frequently found to be quiescent in the vowel ׀ ; as, פֶּטֶר *Peter*, כִּסֵּי *throne*.

The letters ׀ ׀ ׀ , when they are placed after another consonant, which is without a vowel, cannot be pronounced; but they are nevertheless written for the sake of orthography or etymology. In such instances these letters are said to be *otiose*.

Olaph in the pronouns אֵל and אֵל , when they are added to participles for the sake of forming the present tense is *otiose*; as, קוֹלֵטֵי אֵל *kot-litun*, and קוֹלֵטֵי אֵל *kot-loten*, *ye slay*, masc. and fem.

Vau and Yud in the end of a word, when the preceding letter has no vowel, are also *otiose*; as, קָטַלְתֶּם *k'tal*, *they slew*, masc. $\text{קָטַלְתְּ$ *k'tal*, *they slew*, fem. $\text{קָטַלְתְּ$ *k'tul*, *slay thou*, imper. fem.

Yud is likewise *otiose* in the pronoun אַתָּה *at*, *thou*; in certain affixes; as, מַלְכִי *malk*, *my king*,

کتب *k'tho-bek, thy book.* And in some substantives and adverbs; as, של *shel, tranquillity,* *متى*, when?

It is supposed by many grammarians that Yud was pronounced in ancient times and this supposition derives support from the usage in Arabic and Hebrew; for we have حلی, *chali* and *akzari*, which are pronounced *chali* and *akzari*; we have also in the New Testament *ῥαββουρι*, John xx. 16. *ταλιθα κουμι*, Mark v. 41. and other similar expressions.

Consonants are sometimes omitted in writing; as, *ند* end for *ند*, especially in compound words; as, *من* *man* for *من*, *ف* for *ف* *although*. The first radical *ס* of Hebrew words sometimes drops off; as, *one*, Heb. *אחד*. Words which have the middle radical doubled, on many occasions lose one of them; thus, *פע* and *פע* *he perceived*, *ע* *nest* from *ע*.

Vau and Yud fall off in nearly the same manner and in the same situations as in Hebrew, which may be immediately observed by inspecting the paradigms of the classes of verbs beginning with these letters.

Letters are sometimes added to words for the sake of euphony. Thus, Olaph is prefixed to many words beginning with Yud; as, *יד* *hand* for *יד*, *יום* *day* for *יום*.

Olaph prosthetic occurs also in the verbs *שכר* and *מצא*; as, *שכר* *he drunk*, and *מצא* *he found*.

We have also $\text{הֵרֹא} \text{הֵרֹא}$ *hero* from הֵרֹא , where the Nun seems to be a compensation for the Dagesh forte in Hebrew and Chaldee. In some words of Greek origin there is a duplication of the Nun; as, הֵסְנֹוֹת *synod*, for הֵסְנֹוֹת .

A great number of Hebrew words become Syriac words by the change of one or more of their letters.

ז	is changed into	ז	as,	זָהָב	<i>gold</i> ,	זְהָב
צ	ܘ	...	צֹר	<i>rock</i> ,	ܘܘܪ
ש	ܠ	...	שֶׁלֶג	<i>snow</i> ,	ܠܘܟܘܠܝܢܐ
ו	ܘܫ	...	רוץ	<i>he run</i> ,	ܘܫܘܬܐ
ה	ܘܪ	or ܘܪ	גָּלָה	<i>he revealed</i> ,	ܘܪܘܠܝܢܐ or ܘܪܘܠܝܢܐ
ש	sometimes into	ܘܫ	...	בָּשָׂר	<i>flesh</i> ,	ܘܫܘܪܐ
ג	ܘܫ	...	שְׁנַיִם	<i>two</i>	ܘܫܘܝܡܐ
ת	ܘܫ	...	תָּעַד	<i>he wandered</i> ,	ܘܫܘܪܐ .

5. Changes of the Vowels.

Inflexions of words are in numerous cases effected by vowels; certain vowels being selected as characteristic of different forms of the same word. The correspondence between Syriac and Hebrew vowels is as follows:

Pethocho (◌◌) to Patach (◌); as, ܡܠܟܘܢܐ , ܡܠܟܘܢܐ *his king*.

The vowel Revotso (◌◌) corresponds generally to the Hebrew ◌; as, ܬܦܩܘܪ , ܬܦܩܘܪ *thou shalt visit*.

Chevtotso (x) to the Hebrew -- ; as, עֲשֵׂוֹ for עֲשֵׂוֹ .

Zekofo (o) to Kamets τ ; as, אִנְּוֹ , אִנְּוֹ *man*,
 אִנְּוֹ , אִנְּוֹ *he revealed*.

Etsotso (x) to Cholem, Kametschatuph, Shurek and Kibbutz; as, אִנְּוֹ , *holiness*, אִנְּוֹ ; אִנְּוֹ *all*.

Olaph in the beginning of a word, and also Ee in the same situation, when it is before σ , instead of being according to analogy without a vowel, will receive a vowel, for the most part ^ or v ; as, אִנְּוֹ for אִנְּוֹ ;
 אִנְּוֹ for אִנְּוֹ .

Yud observes the same rule at the beginning of a word, and takes the vowel x ; as, אִנְּוֹ *orphan*, for אִנְּוֹ .

The foregoing rule holds good also for the letters Olaph, Vau and Yud when they begin a syllable; the vowel in such places is remitted to the preceding letter, if it has been previously without one; except when the Olaph, Vau or Yud is followed by two consonants in the same syllable. A full exhibition of these principles may be seen by looking at the irregular verbs.

When two consonants come together at the beginning of a syllable, which is sometimes the case in the beginning of a word, in consequence of prefixing prepositions or conjunctions not having a vowel; also in the middle of a word from inflexion; the former consonant will receive a vowel; for the most part -- ; but also ^ ^ ^ ; as, אִנְּוֹ for אִנְּוֹ *in heaven*,

|ʔiː| for |ʔiː| *the letter*, Δʔʔʔʔ for Δʔʔʔʔ *she was slain*, |ʔʔʔʔʔ| *glory* for |ʔʔʔʔʔ|. This is analogous to the Hebrew, when the former of two Shevas coming together in the beginning of a syllable, is generally changed into — .

Vowels are sometimes cast away: when another syllable is added to a word, the final vowel is cast away; as, ʔʔʔ the feminine of ʔʔ *he visited*. But it is preserved, 1st. if a letter only be added; as, ʔʔʔ *thou hast visited*; 2nd. if the consonant from the analogy of the Hebrew ought to have a *Dagesh forte*; thus ʔʔ *people*; in the definite state ʔʔʔ; 3rd. the vowels ʔ and ʔ are preserved; as, ʔʔʔ, ʔʔʔʔ; ʔʔʔ, ʔʔʔʔ.

Zekoko in nouns of the definite state, when it is followed by ʔʔ *is*, is changed into Pethocho so that it may make a diphthong with ʔ; as, ʔʔ ʔʔʔ *da-golau, he is a liar*, for ʔʔ ʔʔʔ; ʔʔ *ho-nau, this is*, for ʔʔ ʔʔʔ and this for ʔʔ ʔʔʔ.

Transposition of vowels takes place; especially in nouns of one syllable; thus, ʔʔ *man* definite state |ʔʔʔʔ| *holiness* definite state ʔʔʔʔ; many other examples will be given in the Chapter on nouns; also the prepositions ʔʔʔ and ʔʔʔʔ with the prefix Lomad become ʔʔʔʔ and ʔʔʔʔ, and in certain

compounded particles a transposition takes place; as, حَرْفٌ for فَرْحٌ *until*.

6. *The Diacritic Points, Kushoi and Rukok.*

The Syrians have no marks corresponding to the *Sheva* and *Dagesh forte* of the Hebrews; but they use a point for the letters حَرْفٌ .

This point when it is situated above a letter takes away the aspiration and when placed below preserves it. In the former case it is called كُشُوِي *Kushoi* which signifies *hardness*, and in the latter رُكُوِك *Rukok*, *softness*.

There is much difference of opinion respecting these points. It is sufficient to observe that *Kushoi* is used for the حَرْفٌ letters in the same manner as *Dagesh lene* of the Hebrews: viz. 1st. In the beginning of words. 2nd. In the middle of a word after a letter which is without a vowel: as, كِنْـپَ *Ken-pe, his wing*. 3rd. In the second radical of the pael and ethpaal conjugations of verbs; if that radical be one of the حَرْفٌ letters; as, لَبَّ *he brake*. 4th. It is used to supply the defect arising from the absence of the first radical in verbs beginning with Yud or Nun; or of the second, when the second and third radicals are the same, or to supply any other similar defect. According to Amira and the old grammarians it never doubles a letter; but on the other hand it must be said that the Eastern Syrians in this respect followed the

A plural noun ending in $\text{ـ}ِ$, or $\text{ـ}ٍ$ has no need of the sign Ribui; since the number is already indicated by the termination.

It is sometimes used with a noun of multitude; as قَتَاةٌ a flock of sheep, to distinguish it from قَتَاةٌ a sheep.

If it be placed over the letter Rish; one of the points coalesces with the point belonging to Rish; as, قَتَاةٌ a herd of oxen.

8. Lines.

A small line is sometimes found above and sometimes beneath a letter of a word.

It is found above a letter principally in the following instances,

1. In abbreviated words; as, قَد for قُدُّوسٌ holy.*
2. When letters are used to express numbers; as, ث 13.
3. In the Particle of Exclamation وَيْ O! to distinguish it from the particle وَي , or.

When it is found beneath a letter; it directs that such letter is not read and is therefore generally called the *linea occultans*. Thus, بِث Bath not Barth, a daughter. It is found,

- (1) In nouns with the middle radical doubled as مَنَّانٌ Manna, إِث a stag.

* قَد for قُدُّوسٌ that is, occurs frequently in ecclesiastical writings, and especially in the Commentaries of Ephraim Syrus.

- (2) With Olaph in the beginning of a word in many instances; as, **اِنَع** *a man*, **اِنْبَر** *another*; especially in the pronoun **اِن**, as often as it is used in the place of the substantive verb; as, **اِن اِن** *I am*.
- (3) With Dolath when it is without a vowel and placed before Thau; as, **اِنْبَر** *new*.
- (4) With *He* in the following cases,
- (a) In affixes; as **اِنْبَر** *his kings*: **اِنْبَر** *he called him*.
- (b) In the verb **اِنْبَر** *was*; when it is redundant, when it is the logical copula, or when it assists in forming the imperfect and plusperfect tenses; as, **اِنْبَر اِنْبَر** *he was*, **اِنْبَر اِنْبَر** *he was visiting*, **اِنْبَر اِنْبَر** *he had visited*. But when it is used in the sense of *to be, to exist*, the line is not found.
- (c) In the pronouns **اِن** and **اِن**; when they are put for the logical copula; as, **اِن اِن** *my body is*.
- (d) In words derived from the Greek, **اِنْبَر** *Rome*.
- (e) In the verb **اِنْبَر** *he gave*.
- (5) With Lomad in some forms of the verb **اِنْبَر**; as, **اِنْبَر** *departing, fem*.

- (6) With Nun in the four pronouns $\Delta\bar{\text{ن}}$, $\text{ن}\Delta\bar{\text{ن}}$, $\Delta\bar{\text{ن}}$, $\text{ن}\Delta\bar{\text{ن}}$ and in some nouns; as, $\{\Delta\bar{\text{ن}}\}$ *the ship*.

- (7) Rish in $\Delta\bar{\text{ر}}$ *a daughter*.

When a line is found under a letter in a verb of the imperative mood of a passive conjugation; it implies that such letter is deprived of its vowel as $\Delta\bar{\text{ر}}$ *Ethkatl*.

9. *Marhetono and Mehagyono.*

The application of these lines is very little attended to, and therefore no particular notice of them is necessary. They serve principally to mark the division and emphasis of syllables in poetry.

Marhetono is a small line above a consonant, which ought to have a vowel, but is to be pronounced without it.

The *Mehagyono* is a line beneath a letter which being without a vowel denotes that it is to be pronounced with one, for the most part with short (◌); as $\{\Delta\bar{\text{ر}}\}$, with Meh. $\{\Delta\bar{\text{ر}}\}$.

10. *Other Diacritic Points.*

A point is sometimes used which, by its position either above or below the word, will determine the true pronunciation and meaning; when without it and without the vowel points, the word would be ambiguous: thus, $\Delta\bar{\text{ن}}$ for $\Delta\bar{\text{ن}}$ *to him*: $\Delta\bar{\text{ن}}$ for $\Delta\bar{\text{ن}}$ *to her*.

- (1) When it is preceded by another Olaph; as, $\overset{\circ}{\underset{\circ}{\text{y}}}\overset{\circ}{\text{y}}$ *Oyar, air.*
- (2) When it is followed by another Olaph without a vowel; as, $\overset{\circ}{\text{y}}\overset{\circ}{\text{y}}\overset{\circ}{\text{y}}$ *m'loyo, fulness.*
- (3) When it is the second letter of the participle peal; as, $\overset{\circ}{\text{y}}\overset{\circ}{\text{y}}$ *Tso-yem, fasting.*

Vau is pronounced as *v* when it begins a word or syllable; as, $\overset{\circ}{\text{v}}$ *va*, $\overset{\circ}{\text{v}}$ *ve*, $\overset{\circ}{\text{v}}$ *vi*: in other places it has the sound of *u* or *w*.

Yud in the beginning of a word with the vowel $\overset{\circ}{\text{y}}$ is not pronounced. It preserves only the sound of its vowel; as, $\overset{\circ}{\text{y}}\overset{\circ}{\text{y}}$ *Inek, he sucked*, $\overset{\circ}{\text{y}}\overset{\circ}{\text{y}}$ *Ikar, he was heavy*. Hence we find that before a Yud of that kind, Olaph is sometimes placed and the vowel belonging to the Yud is transferred to the Olaph; thus, $\overset{\circ}{\text{y}}\overset{\circ}{\text{y}}$ *a hand*, from the Hebrew יָד , is written $\overset{\circ}{\text{y}}\overset{\circ}{\text{y}}$. The pronunciation of either word is the same.

12. Accent.

Grammarians have given a few rules for placing the Accent.

1. In words of two syllables; if the first syllable terminate in a consonant without a vowel; this syllable has the accent; as, $\overset{\circ}{\text{y}}\overset{\circ}{\text{y}}$ *Rám-sho, evening*, $\overset{\circ}{\text{y}}\overset{\circ}{\text{y}}$ *gármo, bone*.

2. If on the contrary the final letter of the word be without a vowel, then the accent is put on the

second syllable; as, لِد *I-léd, he begat*, فَكِد *Po-ked, visiting*. Should each syllable be formed in that manner, then each is affected with the accent; as, فَكِدْ *Pék-dáth, she has visited*.

3. In words consisting of more than two syllables, the accent is generally placed on the penultimate; as, فَكِدْ *Po-rách-tho, bird*, فَكِدْ *Me-kúl-tho, meat*, فَكِدْ *Marth-yo-nú-tho, admonition*.

13. The Method of expressing Numbers.

This is done by the letters and by the assistance of a few marks. Numbers of any magnitude may be expressed, as in the following Table.

	ا	ب	ج	د	هـ	و	ز	ح	ط
	1	2	3	4	5	6	7	8	9
	ب	ب	ج	د	هـ	و	ز	ح	ط
or	ا	ب	ج	د	هـ	و	ز	ح	ط
	10	20	30	40	50	60	70	80	90
	ز	ح	ط						
or	ب	ج	د	هـ	و	ز	ح	ط	
	200	300	400	500	600	700	800	900	
	ا	ب	2000 &c.		ا	ب	10,000	ب	20,000 &c.

Fractions are written thus, $\frac{1}{2}$ $\frac{1}{3}$ &c.

If it be required to add a smaller number to a greater, that is, to express a number consisting of units, tens, hundreds, &c. the letter indicating the greater is put on the right hand of that indicating the less; thus, ا ب 235.

NOUNS.

15. THE simplest forms of nouns are those which consist only of the letters composing the root; as, **مَلِكٌ** *king*, **ذِكْرٌ** *sacrifice*. Such words are evidently in their primitive state.

The augmented forms will consist of the root augmented by one or more of the letters **ل**, **م**, **ن**, **و**, **ي**, **هـ**, **ا**, which to assist the memory may be called **اَلْمَوْنِي**. Thus, **مَذْبُوحٌ** *an altar* from **ذِكْرٌ** *sacrifice*: **تَلْمِيذٌ** *disciple* from **لَمِنَ** *he learned*.

These letters are probably abbreviations of words and the signification of them qualifies that of the primitive word to which they are united.

Nouns having (ء) with the first radical and (و) with the second, are generally nouns signifying persons; as, **زَوْجٌ** *a friend*; whilst those having (و) with the first radical, or ending in و, **مَوْءٌ**, **مَوْءٌ**, **مَوْءٌ**, are *abstract nouns*; as, **مَوْءٌ** *holiness*, **مَوْءٌ** *strength*.

Two words are sometimes compounded in sense; as, **صَوْتٌ** *a voice*. Sometimes the two words are joined together; as, **صَوْتٌ** *lord of enmity*, i. e. *an*

enemy. A great number of compound words occurring in Scripture may be found by referring to the Lexicons of Schaaf and Castell under the words صَدِّيقٌ , صِدْقٌ , صِدْقَانٌ , صِدْقَانَةٌ , صِدْقَانِيٌّ , صِدْقَانِيَّةٌ , &c.

16. *Gender.*

There are two genders: the masculine and feminine. Of the masculine are,

- (1) The names of men and their offices; as, لُوكَا *Luke*, كَاهِنٌ *priest*, مُوسِقِينَ *musicians*.
- (2) Names of nations, rivers, and mountains; as, كَنْعَانَ *Canaan*, أَرْدُنٌ *Jordan*.

Of the feminine gender are the names of women, the offices of women, countries, cities and names of the double members of the human body.

The feminine gender of nouns is also known by the termination. These terminations are ةٌ , ة , ة , ة , as, مَدْحًا *praise*, مَدْحَةٌ *goodness*, مَدْحَةٌ *confession*, مَدْحَةٌ *a part*. The nouns not ending with any of the foregoing letters and not included in the preceding paragraph, are generally masculine.

The feminine gender of adjectives is derived from the masculine by the addition of ة to the end of the latter; thus, مَدْحٌ *good* from مَدْحٌ *masc.* Those ending in ة quiescent convert it into ة moveable; as, مَدْحٌ *pure*, *fem.* مَدْحَةٌ :

A few adjectives insert Yud immediately before the fem. termination; as, קטן *small*, fem. קטנה ; מושלטן *obedient*, fem. מושלטנה .

Some nouns are used in both genders and are therefore termed *common*, such as, לשון *tongue*, ענן *cloud*, &c.

The rules indeed for distinguishing gender are for the most part the same as in Hebrew. The same words, when occurring in both have the same gender; as, ספר and ספרה *book*, יום and יוםה *day*, are masc. ארץ and ארצה *earth*, נפש and נפשה *soul*, are fem.

Words derived from the Greek do not observe the foregoing rules; but generally retain their own gender; as, διαθήκη *fem.*

17. Number.

There are two numbers, the singular and the plural. Masculine nouns make the plural number, 1st. by adding ים to the singular; as, איש *man*, אנשים *men*. 2nd. Those words ending in ן or ב throw away the ן or ב and the termination ים is added; as, ילד *boy*, ילדים *boys*, מטוב plu. מטובים *reprobated*.

Nouns of the fem. gender form the plural by changing the termination ה into ות ; ם and ת into ם , and ת into ת ; as, ספינה *ship*, ספינות *ships*, דמיון *similitude*, דמיונות *similitudes*, חלק *portion*, חלקים *portions*, צב *usury*, in the plural צבין .

Many of the Syriac nouns have the masculine form in the sing. and fem. in the plural; as, ܐܘܪܐܢܐ *physician*, plu. ܐܘܪܐܢܐ ; ܕܘܠܐ *place*, plu. ܕܘܠܐ ; ܩܘܪܘܢܐ *throne*, plu. ܩܘܪܘܢܐ .

There are others which have the fem. form in the sing. and masc. in the plural; as, ܐܠܐ *ell*, plu. ܐܠܐ ; ܕܘܠܐ *wall*, plu. ܕܘܠܐ ; ܕܘܠܐ *tear*, plu. ܕܘܠܐ ; ܕܘܠܐ *talent*, plu. ܕܘܠܐ ; ܕܘܠܐ *year*, plu. ܕܘܠܐ .

Nouns compounded of two words sometimes admit a plural in the former; as, ܒܢܐܝܢܐ *sons of man or men*; sometimes in the latter; as, ܕܘܠܐ *enemies*, and sometimes in both; as, ܕܘܠܐ (daughters of words) *words, fables*.

Some nouns are found in the plural form only; as, ܩܘܪܘܢܐ *heavens*, ܕܘܠܐ *life*, ܩܘܪܘܢܐ *water*.

Some nouns have a double form, one masc. and the other fem.; such as, ܐܘܪܐܢܐ *father*, plu. ܐܘܪܐܢܐ and ܐܘܪܐܢܐ .

There are other nouns which are very irregular; as, ܕܘܠܐ *nation*, plu. ܕܘܠܐ .

Many words of a Greek origin retain the Greek termination in the plural; as, ܕܘܠܐ *dogma*, plu. ܕܘܠܐ *dogmata*. Others terminate in ܐܘܪܐܢܐ , ܐܘܪܐܢܐ , ܐܘܪܐܢܐ or ܐܘܪܐܢܐ , resembling the termination *as* of the Greek accusative plural; as, ܕܘܠܐ , *διαθηκη*, plu. ܕܘܠܐ , *διαθηκας*, &c.

18. *States of Nouns.*

To the absolute and constructive state of nouns, which the Hebrews have, the Syrians add a third, *the Definite*, or as it has been more generally called, *the Emphatic*. This is indicated by the termination and is equivalent in general to the article $\bar{\text{א}}$ before a Hebrew noun. It happens however that the primary signification of this state has been departed from in many instances, and nouns are found in the def. state when only an indef. sense is intended to be expressed. The rules for passing from one state to another depend either upon the gender, the number, or the final letter, or on more than one of these. First for

19. *Masculine Nouns.*

In the singular number the absolute and constructive states are the same.

The definite state is obtained by the addition of $\bar{\text{ך}}$ to the end of the absolute. Hence the definite state of masculine nouns and the absolute state of feminine nouns have the same form.

Those nouns ending in $\bar{\text{ך}}$ in the absolute state, in the definite, the $\bar{\text{ך}}$ is changed into $\bar{\text{כ}}$.

The constructive state plural number is formed by changing the termination $\bar{\text{ך}}$ of the absolute into $\bar{\text{כ}}$ and $\bar{\text{ך}}$ into $\bar{\text{כ}}$.

The def. plu. is formed from the absolute by changing the termination $\bar{\text{ך}}$ into $\bar{\text{ך}}$ and $\bar{\text{ך}}$ into $\bar{\text{כ}}$; this and the preceding rules will be illustrated by some examples, which will presently follow.

To ascertain the changes of vowels, which nouns undergo in their different states of both numbers, or which is the same thing, given the abs. state sing. num. to find the vowels and their position in the constr. and def. states for both numbers.

Ist. If a word consist of three consonants and a vowel on the second consonant, which is the case with a very large class of nouns, this form is equivalent to one of the *old* forms of segolate nouns in Hebrew. In Syriac these forms are I. ܘܘܠܐ the alternate form of which is ܘܘܠܐ or ܘܘܠܐ . II. ܘܘܠܐ alt. ܘܘܠܐ or ܘܘܠܐ . III. ܘܘܠܐ alt. ܘܘܠܐ . Now whenever the noun in its primitive form receives a syllabic augment, the alternate form is used; thus, ܘܘܠܐ *man*, def. ܘܘܠܐ . We have therefore only to add the proper termination to the alternate form to obtain the def. state sing. or the abs. const. and def. states plural*. Thus,

Singular.

ܘܘܠܐ	ܘܘܠܐ	<i>morning</i> 1
ܘܘܠܐ	ܘܘܠܐ	<i>book</i> 2
ܘܘܠܐ	ܘܘܠܐ	<i>servant</i> 3
ܘܘܠܐ	ܘܘܠܐ	<i>wing</i> 4.
ܘܘܠܐ	ܘܘܠܐ	<i>captive</i> 5
ܘܘܠܐ	ܘܘܠܐ	<i>body.</i> 6

* Exception. In ܘܘܠܐ the vowel remains in its place in the abs. and def. states plural.

Plural.

Def.	Constr.	Abs.		
فُجْرٌ	فُجْرٌ	فُجْرٌ	mornings	1
كُتُبٌ	كُتُبٌ	كُتُبٌ	books	2
خُدَّامٌ	خُدَّامٌ	خُدَّامٌ	servants	3
جُنُوحٌ	جُنُوحٌ	جُنُوحٌ	wings	4
قُتَبٌ	قُتَبٌ	قُتَبٌ	captives	5
جُودٌ	جُودٌ	جُودٌ	bodies.	6

1. In the foregoing examples, that which is marked (1) comprehends all those nouns having γ on the second consonant, and remitting it to the first in the process of inflexion; such are : جُودٌ *body*, خُدَّامٌ *dust*, قُتَبٌ *time*, فُجْرٌ *beard*.

2. In the second example, we have those nouns which take γ in the second consonant, but in inflexion, it is changed to α and remitted to the first. The truth is, the vowel α is the proper vowel in both places, and the reason of the change is that in such nouns the last letter is a guttural or Rish.

3. In the third example are included those nouns whose forms are كُتُبٌ and جُنُوحٌ , such are مُلْكٌ *king*, عِظَةٌ *bone*, زَوْجٌ *husband*, عِزٌّ *anathema*, نَفْسٌ *soul*.

4. The fourth example belongs to that class of nouns whose forms are كُتُبٌ and جُنُوحٌ .

5. Nouns having the third radical Olaph, take the forms which are exhibited in the example مُنْبَغِيٌّ ; but مُنْبَغِيٌّ *manifest*, مُنْبَغِيٌّ *covered*, have their definite forms مُنْبَغِيٌّ , مُنْبَغِيٌّ . مُنْبَغِيٌّ

boy, makes in the def. plu. בְּנָיִם ; as if from the obsolete word בְּנָי , we have likewise בְּנָיִם as if from בְּנָי .

6. All nouns of the forms שָׁמַיִם and שָׁמַיִם are represented by the sixth example.

בְּרֵית *herb*, def. בְּרֵיתִי may be considered as belonging to the same class of nouns, as חַיִּי . The Yud has *Chevotso*, because this letter is never without a vowel when it begins a word. If the last consonant be a guttural or Rish, it is preceded by the vowel *Pethoco* instead of *Revotso*; as, בְּרֵיתִי *month*, בְּרֵיתִי *heap of stones*.

Such nouns as, עַיִן *eye*, יוֹם *day*, correspond to the Hebrew segolate nouns. In these, the vowel is changed into י , in the def. state sing., and all the states plu., and this new vowel makes a diphthong with ו or ב , thus;

2nd. Other classes of nouns are the following.

1. Such nouns as admit no change of vowels in inflexion; thus,

Singular.

Def.	Abs. and Constr.
صِبَا x	صِبَا evil. x

Def.	Constr.	Abs.
صِبَا a x	صِبَا x	صِبَا x x

The vowel Zekoko is immutable, and therefore monosyllables with this vowel are represented by صِبَا; as, صِبَا portion, صِبَا book. Nouns also having two or more syllables, if the penultimate terminate in a consonant, or if the ultimate syllable be perfect without the terminating consonant, belong to this class; as, صِبَا explanation, صِبَا disciple. Some nouns wanting an absolute state may be referred to it; as, صِبَا the stag, صِبَا the lion, صِبَا the serpent, صِبَا death, صِبَا winter, صِبَا conversation, for the form of the definite state remains in all the parts of their inflexion. Finally, nouns which possess either of the following forms preserve their vowels immutable, viz. صِبَا def. صِبَا, صِبَا def. صِبَا. A few nouns appear to correspond with the segolate nouns in Hebrew, but which really belong to this class; as, صِبَا carcase, صِبَا small, صِبَا magician.

2. Monosyllables, the vowel of which is ν or γ , nouns of many syllables, the last of which is mutable, are exemplified in the following Table.

Singular.

Def.		Abs. and Constr.

كُوفٍ	كُوفٍ	كُوفٍ <i>Priests</i>
اَوْزَلٍ	اَوْزَلٍ	اَوْزَلٍ <i>Paths.</i>

The noun **ابنٌ** *son*, makes in the plural **ابنٌ** *sons*; as if it were derived from a different root. Also **كوفٍ** is peculiar in receiving the consonant **ك** in the plural; thus, **كُوفٍ**, **كُوفٍ**, **كُوفٍ**.

3. Nouns of more than one syllable, terminating in Olaph or Yud may constitute another class. Such are,

Singular.

A few nouns double the last letter in the plural; but the *linea occultans* is placed under the first of the two letters; thus, سَء *sea*, plu. سَءِىَ سَءِىَ , شَء *people*, is also another instance.

20. States of Feminine Nouns.

In the singular number the constructive state, changes ى of the absolute into ىٰ ; thus, سَءِىَ *year* سَءِىٰ .

Nouns, which in the absolute state terminate in ة or ة in the constructive, end in ة or ة ; as, فَءِىَ *victory*, constr. فَءِىٰ : زَءِىَ *usury*, constr. زَءِىٰ .

Fem. nouns having a masc. termination; as, بَءِىَ *belly*, those ending in ىٰ ; as, أَءِىَ *portion*, make the abs. and constr. states the same.

The definite state of fem. nouns, which have a masc. termination is the same as that of masc. nouns; as, بَءِىَ *belly*, def. بَءِىٰ .

In the def. state the ىٰ of the abs. is changed into ىٰ ; as, كَلِمَءِىٰ *word*, def. كَلِمَءِىٰ .

If the word in the abs. state terminate in ىٰ ; the Yud becomes quiescent in the def. state and the preceding consonant takes ء ; if the termination in the abs. be ة ; then Vau becomes quiescent in ء in the def. EX. 4. 5.

Nouns ending in ة or ة , make the def. by the addition of ىٰ ; those ending in ىٰ add only ىٰ in the def. EX. 6. 7. 8. 9.

To avoid the concourse of several consonants without a vowel, or which is the same thing, to facilitate the pronunciation; a vowel, namely v or a is placed with the second or third radical; as, وَصَلًّا *widow*, def. وَصَلًّا .

A few nouns ending in و in the abs. masc.; in the def. state fem. assume x under the Nun, which is followed by و ; as, مَنْفَعَةٌ , def. fem. مَنْفَعَةٌ *comforter*.

In the plural number the constr. state is derived from the abs. by changing the final و into ل and the def. is derived from the abs. by changing و into ل .

The Examples in the following Table will further illustrate what has been here said on the states of fem. nouns.

صُفُوفٌ	صُفُوفٌ	صُفُوفٌ	portions	9

1. In No. 1; we have an example of those nouns ending in ^{f} which undergo no change of vowels in their different states; such are, ^{f} *evil*, ^{f} *an egg*, ^{f} *circumcision*.

2. Nouns which assume an additional vowel in the def. state singular.

3. This example represents nouns in which the vowel on the 1st. rad. of the abs. sing. is removed to the 2nd. rad. in the def. They partake of the character of segolate nouns in Hebrew.

4, 5. In these examples we have nouns whose terminations are ^{f} and ^{f} . A few nouns belonging to the latter cast away the vowel of the first rad. in the def. state sing.; as, ^{f} *blow*, def. ^{f} .

6. This is an example of nouns, ending in و , which preserve their vowels unchanged, and in which no new vowel is introduced; as, بَيِّنَةٌ *liberty*, عُقُودَةٌ *equality*, نُفْعَةٌ *utility*.

7. Nouns represented by فُلْتَةٌ are such as receive another vowel in the plu. viz. ا or و , which is placed on the 2nd rad.; as, نُبُوءَاتٌ *prophecy*, حُرُوبَاتٌ *war*.

8. This is the model of nouns, the abs. state of which ends in ب . In the plural Yud quiescent is changed into Yud moveable.

9. In the nouns represented by فُلْتَةٌ , we have in the plural ل taken away and و moveable placed before the plural termination; such are, ذَبَائِحٌ *sacrifice*, غُسلاتٌ *ablution*.

In some instances the last letter is written twice in the plural; as, طَلٌّ *bride*, plu. طَلَّطٌ .

There are some anomalies; as, مُحَمِّدَاتٌ *praise*, أَقْرَبَاتٌ in the def.; أَقْرَبَاتٌ *sister*, plu. def. أَقْرَبَاتٌ .

21. The Syrians have no cases, which are marked by terminations; but the nominative and oblique cases of the Greeks and Latins are known by the context, or are expressed by the constructive state, by the influence of a transitive verb, or by some particle; as, لَا أَلَا أَلَا مَعْ كَمَا , &c. preceding; thus,

يَفْعَلُ يَفْعَلُ *Jesus departed*.

كَلِمَاتُ اللَّهِ *words of God*; or, كَلِمَاتُ اللَّهِ *words of God*.

ܠܩܘܘܘܠܝܢܐ *to the king*; ܠܝܫܘܥ *to Jesus*; ܠܥܘܩܒܐ *to the blind man*.

ܘܥܝܢܐ ܕܥܝܘܒܐ *we have seen his glory*; ܐܝܬܐ ܕܠܘܟܠܐ *God loved the world*. Sometimes we see ܠ in imitation of the Hebrew ܠ. See Gen. i. 1.

ܐܘܢܐ ܐܘܢܐ *O! woman*. See also Acts i. 1.

ܠܩܘܘܘܠܝܢܐ *with the king, &c.*

Adjectives.

22. The Syriac adjectives are few, but this defect is supplied by other words, which when placed in certain positions obtain the use and signification of adjectives. For instance, the state of construction will supply the force of an adjective; as, ܠܥܝܘܒܐ ܕܥܝܘܒܐ *city of holiness*, i. e. *holy city*, Matth. iv. 5. Also a substantive put absolutely with ܐ prefixed; as, ܐܘܢܐ *a natural body*, ܐܘܢܐ ܕܥܝܘܒܐ *a spiritual body*, 1 Cor. xv. 44. Also in other ways; as, *the fire*, (ܐܘܢܐ ܕܥܝܘܒܐ) *which is not extinguished*, i. e. *inextinguishable* ܐܘܢܐ ܕܥܝܘܒܐ ܐܘܢܐ ܕܥܝܘܒܐ *they to whom he showed himself alive*, lit. (*as living*.)

Adjectives are distinguished by gender, number and states, which are the same as in the substantives. It is only necessary to notice that in adjectives, the masc. def. and the fem. abs. have the same form; but they are easily known one from the other by the substantive or the verb with which they are

connected. The degrees of comparison are not to be found in a change of the adjective, but are merely marked by certain particles and connections.

The comparative is expressed by the positive construed with أَكْبَرُ either preceding or following it; as, $\text{أَكْبَرُ كُلِّ شَيْءٍ}$ *greater than all*; there is sometimes added أَكْبَرُ *powerfully*; or, أَكْبَرُ *more*; as, $\text{أَكْبَرُ مِنْ سَيْفِ ثَلَاثِيهِ}$ *and sharper than a two edged sword, lit. very much sharper. Blessed is he who gives أَكْبَرُ مِنْ أَنْ يَأْتِيَهُ *more than he who receives.* The comparative is sometimes marked by the sense of the passage only; as, $\text{أَكْبَرُ مِنْ أَصْغَرٍ}$ *the elder shall be servant to the younger.**

The superlative is often formed by the duplication of the positive; as, أَكْبَرُ أَكْبَرُ *least*; sometimes by adding the particle أَكْبَرُ *very*, which is equivalent to the מְאֹד of the Hebrews; as, أَكْبَرُ أَكْبَرُ *worst*, plu.; sometimes again by أَكْبَرُ *much*; as, أَكْبَرُ أَكْبَرُ *most honoured*; or, by أَكْبَرُ prefixed to the plural; as, أَكْبَرُ أَكْبَرُ *small among kings, i. e. the least of kings*; or as, أَكْبَرُ أَكْبَرُ *least of the Apostles, literally, least of those who (are) the Apostles*; or it is expressed in the following manner; *whosoever therefore shall break one أَكْبَرُ مِنْ أَكْبَرُ* *of these least commandments.* Matth. v. 19. see also two other places in this verse.

Many adjectives are formed by the addition of لٌ to the words from which they are derived; thus, لٌجسدي corporeal, لٌجبل mountainous, لٌحبيبي primitive; so also adjectives having a Greek origin; as, لٌجباري barbarous, لٌجباري aerial. In some instances the termination لٌ is added to the primitive word to form the adjective; as, لٌجباري primary, لٌجباري hairy, لٌجباري proper.

23. Numerals.

Numerals are either cardinal (لٌجباري), or ordinal (لٌجباري).

Ordinal.

From ten to twenty the numbers one, two, &c. are prefixed to ten, in the following manner.

١٠٠٠٠		١٠٠٠٠	<i>eleven</i>
١٠٠٠١		١٠٠٠٢	<i>twelve</i>

١٠٠٠٠		١٠٠٠٠	<i>eleventh</i>
١٠٠٠١		١٠٠٠٢	<i>twelfth</i>
١٠٠٠٢		١٠٠٠٣	<i>thirteenth.</i>
&c.		&c.	

The law for deriving them from the cardinal is sufficiently obvious.

Cardinal numbers from three are for the most part joined to the thing numbered by Apposition in the abso-

lute state; as, $\text{أَرْبَعَةُ أَشْهُارٍ}$ *four months*; عَشْرُ صَبَاغَاتٍ *ten virgins*. But the constructive state is occasionally used; thus in Matth. iv. 25. we have عَشْرُ مَدِينَاتٍ *ten cities*, literally, *a decad of cities*.

These numbers are frequently found to occupy the place of ordinals. In Luke i. 59. we have $\text{أَمْسَاحٌ ثَمَانِيَةٌ}$ *the day which (is) eight*, i. e. *the eighth day*, وَسَاعَةٌ سِتَّةٌ *sixth hour*.

Denary numbers from 20 to 90 are expressed in the plural and are of the common gender; thus, عِشْرُونَ *twenty*, ثَلَاثُونَ *thirty*, أَرْبَعُونَ *forty*, خَمْسُونَ *fifty*, سِتَّةُونَ *sixty*, سَبْعُونَ *seventy*, ثَمَانُونَ *eighty*, تِسْعُونَ *ninety*.

The ordinals are derived from these by adding the termination ا for the masculine, and اِة for the feminine; as, masc. عِشْرِينَ fem. عِشْرِينَة *twentieth*.

The remaining numerals are, مِائَةٌ *a hundred*, مِائَتَانِ *two hundred*, ثَلَاثَمِائَةٍ *three hundred*, &c. which are formed by prefixing the less number of the feminine gender before مِائَةٌ . Also, أَلْفٌ or أَلْفَةٌ *a thousand*, fem. أَلْفَةٌ , plu. عَشْرُ أَلْفٍ , عَشْرَتَا أَلْفٍ , $\text{عَشْرَتَا أَلْفَيْنِ}$ *ten thousand*.

Twice, thrice, &c. are sometimes expressed by cardinals, with the noun مَرَّةً *time* after it; as, مَرَّةً مَرَّةً *once*, lit. *one time*.

Words denoting a part of the whole are, ثُلُثٌ *a third part*, رُبُعٌ *a fourth part*, عَاشِرٌ *a tenth*, &c.

Multiples, as double, treble, &c. are expressed by سَبْعُ , and a cardinal number following with ع prefixed, or sometimes without it; as, سَبْعُ عَشْرًا *seven fold*, lit. *one in or into seven*, سَبْعُ عَشْرًا *double*.

The days of the week are, سَبْعُ عَشْرًا *first day of the week*, سَبْعُ عَشْرًا *second day*, &c.

PRONOUNS.

24. PRONOUNS are sometimes *separable*, i. e. consist of words, and sometimes *inseparable*, i. e. they are expressed by certain particles called *affixes* placed at the end of nouns, verbs, or other particles. The following is a Table of the personal pronouns.

<i>Plural.</i>			<i>Singular.</i>		
Fem.	Com.	Masc.	Fem.	Com.	Masc.
	سِنَ			أَنَا	
		<i>We</i>			<i>I, 1st person.</i>
أَيْدِي		أَيْدِي	أَيْدِي		أَيْدِي
		<i>You</i>			<i>Thou, 2d.</i>
تِي		تِي	تِي		تِي
		} <i>They.</i>			} <i>He, 3d.</i>
يِي		يِي	يِي		يِي
		} <i>They.</i>			} <i>She</i>
					} <i>He, 3d.</i>

تُو and تُو are also used for the demonstrative pronouns; as, تُو تُو *that man*, تُو تُو *that woman*.

تِي and تِي are for the most part found after a transitive verb; as, تِي تِي *they have filled them*, John ii. 9.

25. *The Demonstrative Pronouns.*

تُو	}	<i>this, fem.</i>	تُو	}	<i>this, masc.</i>
تُو			تُو		
تِي	}	<i>these, of both genders.</i>	تِي	}	<i>these, masc.</i>
تِي			تِي		

These become reciprocal by being joined to the personal pronouns; as, הוּא הוּא *he himself*, היא היא *she herself*.

הוּא and היא coalesce with הוּא and היא ; and then we have the following compounds, זוּהוּא *this is*, masc. היא זוּהיא *this is*, fem.

26. *The Relative and Interrogative Pronouns.*

The *relative* is הוּא of both genders and numbers and is prefixed to words. It is probably the same as the Hebrew הוּא (which has sometimes the power of a relative pronoun) and has the same use and signification; as, הוּא or הוּא .

The interrogatives are,

of the person הוּא , היא , *who?*

of the thing הוּא , היא , הוא , היא , *what?*

הוּא is of both genders and numbers. היא is compounded of הוּא and היא ; as, הוּא הוּא הוּא *who hath opened his eyes?* lit. *who is he, who hath opened for him his eyes?*

Interrogatives of both person and thing are הוּא masc. היא fem. *who, which, what?* of the sing. numb. and הוא , *who, which, what?* of the plural.

When הוּא is used with these interrogatives, they become relatives; as, הוּא הוּא הוּא *he who goeth not up*, הוּא הוּא הוּא *the bear which he saw*.

Care must be taken not to confound ف with the preposition ف . Before the use of vowels the former word was written ف with a point above it and the latter ف .

27. The following Table exhibits what are called *pronominal affixes*, which are added to the end of nouns. They are certain abbreviated terminations or inseparable particles and have the signification of possessive pronouns.

<i>Plural.</i>		<i>Singular.</i>	
ب com. gender.	<i>my</i>	ب com. gender.	<i>my</i>
م masc.	<i>thy</i>	م masc.	<i>thy</i>
ت fem.	<i>thy</i>	ت fem.	<i>thy</i>
ه masc.	<i>his</i>	ه masc.	<i>his</i>
ه fem.	<i>her</i>	ه fem.	<i>her</i>
ن com.	<i>our</i>	ن com.	<i>our</i>
ك masc.	<i>your</i>	ك masc.	<i>your</i>
ك fem.	<i>your</i>	ك fem.	<i>your</i>
ل masc.	<i>their</i>	ل masc.	<i>their</i>
ل fem.	<i>their</i>	ل fem.	<i>their.</i>

28. There are separate possessive pronouns. They are expressed by the letters ي , which are put before the affixes; thus, ي *my*, ي *thy*, masc., ي *thy*, fem., ي *his*, ي *her*, ي *our*, ي *your*,

masc., ܕܝܚܝܒܝܗ *your*, fem., ܕܝܚܝܒܝܗܝܗ *their*, masc., ܕܝܚܝܒܝܗܝܗ *their*, fem.

Distributive pronouns are expressed by ܐܝܢܝܗܘܢ , ܐܝܢܝܗܘܢ and the preposition ܡܝ ; sometimes the substantive is taken away and the distributive pronoun is indicated by ܡܝ only; thus, ܐܝܢܝܗܘܢܡܝܗܘܢ *some of them*, or ܡܝܗܘܢܡܝܗܘܢ *some of them*. Also ܘܡܝܗܘܢ or ܘܡܝܗܘܢܡܝܗܘܢ *whosoever*, ܘܡܝܗܘܢܡܝܗܘܢ or ܘܡܝܗܘܢܡܝܗܘܢ *whatsoever*. The latter pronoun is composed of ܘܡܝܗܘܢ *all*, and ܘܡܝܗܘܢܡܝܗܘܢ *something*; or, *any thing*.

Other pronouns are formed by adding the affixes to the nouns ܢܦܫܐ *soul* or *person*, and ܘܚܘܪܐ *substance*, or *person*; as, ܘܚܘܪܐܢܦܫܐܗܘܢ *save thyself*. ܘܚܘܪܐܢܦܫܐܗܘܢ *and he went, hanged himself*. ܘܚܘܪܐܢܦܫܐܗܘܢ *in himself*. See, also John vi. 53.

29. Nouns with Affixes.

We come now to nouns with affixes. The vowel changes of nouns receiving the affixes in Hebrew are many and complicated; but in Syriac are few and simple. The following is an example of a masculine noun, which is first put in the definite state and then takes the affixes in the place of the termination ܐ .

Singular.

Def. State.	مَلِكًا	king
1st. pers. sing. com.	مَلِكِي	my king
2nd. masc.	مَلِكُكَ	thy
2nd. fem.	مَلِكُكِ	thy
3rd. masc.	مَلِكِهِ	his
3rd. fem.	مَلِكِهَا	her
1st. pers. plu. com.	مَلِكُنَا	our
2nd. masc.	مَلِكُكُمْ	your
2nd. fem.	مَلِكِكُمْ	your
3rd. masc.	مَلِكِهِمْ	their
3rd. fem.	مَلِكِهِنَّ	their.

Plural.

1st. pers. sing. com.	مَلِكًا	my kings
2nd. masc.	مَلِكُكَ	thy
2nd. fem.	مَلِكُكِ	thy
3rd. masc.	مَلِكِهِ	his
3rd. fem.	مَلِكِهَا	her
1st. pers. plu. com.	مَلِكُنَا	our
2nd. masc.	مَلِكُكُمْ	your
2nd. fem.	مَلِكِكُمْ	your
3rd. masc.	مَلِكِهِمْ	their
3rd. fem.	مَلِكِهِنَّ	their.

1. The word مَلِكًا is pronounced *Malk*; the *ل* being *otiose*.

2. Nouns in the singular number the definite state of which terminates in لٌ, form the affix of the first person singular in بٌ, and the second and third persons plural in يٌ, يٌ, يٌ, يٌ; thus, لٌ boy, بٌ my boy, يٌ your boy, يٌ their boy. لٌ Lord, which takes the affixes from لٌ, is an exception to this rule.

3. Those nouns having the abs. state; as, صٌ, and the definite; as, صٌ retain the ؤ with the affixes of the first person sing. and second and third persons plu.; as, صٌ my priest. Again, those in the abs. state having the vowel ʾ on the last syllable, and any other vowel on the preceding syllable; the ʾ is preserved with the affixes of the above-mentioned persons; as, صٌ, abs. صٌ altar, صٌ my altar.

4. There are some nouns, namely, monosyllables; which have the vowel ؤ in the abs. state; and which lose it in the definite. Such nouns preserve the ؤ with the affixes of the above-mentioned persons; as, دٌ def. دٌ blood, دٌ my blood.

5. Some nouns in the plural number receive the affixes both in the def. and const. states. They are those which terminate in the absolute state in ء; the definite in لٌ and the constructive in بٌ.

Note, صٌ has two significations. 1st. my kings. 2nd. kings of; as, دٌ kings of the earth.

Three nouns, namely, **أَبٌ** *father*, **إِخْوَانٌ** *brother*, **سَوْءٌ** *father-in-law*, take the affixes in an irregular manner.

1st. pers. sing. com.	أَبِي	<i>my father</i>
2nd. masc.	أَبُكَ	<i>thy</i>
2nd. fem.	أَبُكِ	<i>thy</i>
3rd. masc.	أَبِئِهِ	<i>his</i>
3rd. fem.	أَبِئِهَا	<i>her</i>
1st. pers. plu. com.	أَبْنَاهُ	<i>our</i>
2nd. masc.	أَبْنَاهُمْ	<i>your</i>
2nd. fem.	أَبْنَاهُنَّ	<i>your</i>
3rd. masc.	أَبْنَاهُمْ	<i>their</i>
3rd. fem.	أَبْنَاهُنَّ	<i>their</i>

The other two nouns take the affixes in the same way; except that **سَوْءٌ** makes **سَوْءِي** *my father-in-law*.

See obs. 4, p. 45.

30. In feminine nouns the same affixes are used for both numbers; namely, those which are annexed to the singular number of masculine nouns. They are put to the end of feminine nouns in the constructive state in the first person singular, and in the second and third persons plural, and at the end of their definite state in the other parts, the termination **ة** having been taken away. The reason of this difference is, that in the pronominal affixes mentioned; if they were placed to the definite state of the noun, there would be a concourse of several consonants without a vowel.

The following is an example of feminine nouns with affixes.

Singular.

abs.	فاميلة	family	const.	الفاميلة	def.	فاميلة	
1st. pers. sing. com.					فاميلتي	my family	
2nd. masc.					فاميلتك	thy	
2nd. fem.					فاميلتك	thy	
3rd. masc.					فاميلته	his	
3rd. fem.					فاميلتها	her	
1st. pers. plu. com.					فاميلتنا	our	
2nd. masc.					فاميلتكم	your	
2nd. fem.					فاميلتكن	your	
3rd. masc.					فاميلتهم	their	
3rd. fem.					فاميلتهن	their.	

Plural.

1st. pers. sing. com.					فاميلاتي	my families	
2nd. masc.					فاميلتك	thy	
2nd. fem.					فاميلتك	thy	
3rd. masc.					فاميلته	his	
3rd. fem.					فاميلتها	her	
1st. pers. plu. com.					فاميلتنا	our	
2nd. masc.					فاميلتكم	your	
2nd. fem.					فاميلتكن	your	
3rd. masc.					فاميلتهم	their	
3rd. fem.					فاميلتهن	their.	

بُحْرٌ with the affix ا transfers the ʾ from the first to the following letter; thus, اْبُحْرٌ *my daughter*; but it remains in the others; as, بُحْرٌ *thy daughter*, بُحْرُكُ *your daughter*.

31. Numerals and Particles with Affixes.

Numerals also receive the affixes of masculine nouns in the plural number; thus, هَاتَيْنِ *these two, masc.*, هَاتَيْنِ *these two, fem.*, هَاتِلَاتٍ *these three, masc.*, هَاتِلَاتٍ *these four*, هَاتِلَاتٍ *these five*, هَاتِلَاتٍ *these six*, هَاتِلَاتٍ *these seven*, هَاتِلَاتٍ *these eight*, هَاتِلَاتٍ *these nine*, هَاتِلَاتٍ *these ten*.

When the singular affixes are annexed, they have the power of possessive pronouns, and possess therefore another signification. For example, هَاتِي *his ten*, هَاتِي *thy ten*, هَاتِي *their ten*, and we find very frequently in the New Testament هَاتِي *his twelve*, speaking of the twelve disciples of Christ.

A great number of particles take the affixes; as, ا in, ا in me, ا in thee; ا to, ا to you, ا from, ا from him, ا from us, ا after, ا after them, &c. Some particles take the affixes of masc. nouns plu.; as, ا before, ا before me, ا before thee; so likewise, ا on or upon, ا for, instead of, and others.

Ethpeel is the passive of the preceding conjugation, and like the other passive conjugations has the syllable לִּי prefixed*.

Pael is the Piel of the Hebrews, when the signification of the Peal conjugation is intransitive, the Pael makes it transitive; as, אָזַן *he was just*, Pael אָזַן *he justified*; sometimes it expresses the Peal sense with greater energy; as, שָׁלַח *he sought*, Pa. *he sought diligently*. This conjugation has a causative sense in some verbs; as, אָבַח *he bought*, אָבַח *he caused to buy*, i. e. *he sold*. To the Pael is sometimes assigned the sense of *commanding, permitting and declaring* what is expressed by the Peal, and sometimes these two conjugations have the same signification.

Ethpaal is the passive of the preceding conjugation. As the Pael, in many instances, signifies *to make or cause to do* whatever is indicated by the Peal; the Ethpaal will necessarily signify *to be made to do*, that which is denoted by the Peal, and hence it is that the Peal and Ethpaal conjugations in some verbs possess the same meaning; as, אָבַח *he thought*, אָבַח לִּי *he was made to think*, i. e. *he thought*.

* Professor Lee in his Heb. Gram., supposes לִּי to be a fragment of the verb יָצַח *he came*; that it was originally written in full; but in process of time it was pronounced and afterwards written with the verb, the sense of which it qualified. See in his Chap. on *Heemanti nouns*, his account of the force of this and other particles which are prefixed to primitive words.

Aphel corresponds to the Hiphil of the Hebrews. In sense it is usually causative of Peal; as, זָכַרְתִּי *he remembered*; Aph. זָכַרְתִּי *he caused to be remembered; he commemorated*. It is also found to possess the signification of *desiring, permitting, declaring, exhibiting, &c.* whatever is indicated by the Peal; as, אֶמְצֵא *he permitted, or granted power*, אֶמְצֵא *he exhibited trouble*. In some instances it has an intransitive meaning; as, זָרַח *it shone*. The characteristic is י prefixed to the root.

The preceding conjugations are of very frequent use, and are acknowledged by all Grammarians. Those which follow are of much rarer occurrence.

The Ethtaphal is the passive of the preceding conjugation. It is formed from the Aphel by prefixing the particle ל , and changing the Olaph, the characteristic of the Aphel conjugation, into Thau. Examples of this form are seldom found. See Mark xiii. 24. (Philox. vers.) *the sun* לֹא יִשְׁכַּח *shall be darkened*.

The Shaphel conjugation is generally considered to have the same signification as the Aphel; it is formed by prefixing ש to the root, and like the Pael and Aphel take ו under the second radical instead of ו . By many persons this conjugation has been referred to quadrilateral verbs; but it is found so frequently, much more so than the Ethtaphal, that Michaelis and others have made it a separate conjugation of trilaterals.

Examples are, فَعَلَ *he made* or *caused to serve*, فَعَلَ *he inflamed*, فَعَلَ *he made perfect*.

Eshtaphal is the passive of the preceding conjugation, and is formed from it by prefixing لِ , transposing the ل with the ف , and changing ن under the second radical into و .

The *Eshtaphal conjugation* agrees in form with the tenth conjugation of Arabic verbs.

If the first radical of a verb be ل , س , ز , ف ; it is transposed with ل of the particle لِ in the Ethpeel and Ethpaal conjugations; as, لَفِيَ *he was left*, instead of لَفِيَ ; لَفِيَ *he was lifted up*, instead of لَفِيَ . After ل , the ل is changed into ز , and after ز into س ; as, لَفِيَ *he was conquered*, لَفِيَ *he was crucified*.

Verbs are either *regular* or *irregular*. The former class includes all those verbs which preserve their radicals unchanged throughout all their inflexions, the latter those, which lose or undergo a change of one or more radicals.

There are two tenses, the præterite and future. Their forms are فَعَلَ and يَفْعَلُ and these forms determine the past and fut. times more accurately than they do in Hebrew. The present tense may be expressed by the active participle with the aid of the personal pronouns. By means also of the auxiliary verb two other tenses are defined; namely, the imperfect and plusperfect, of which some account will be afterwards given.

The different numbers, persons and genders are formed by prefixes and affixes joined to the root of the verb as in the Hebrew.

The Imperative form is used in an affirmative sense. A negation or prohibition is expressed by the future tense and the particle ׀ not placed before it.

The Infinitive is in its nature an abstract noun, and as such receives the pronominal affixes. It has an active, neuter, or passive sense; and when added to the verb will give intensity to the signification.

33. Before we proceed to give the tables of the different classes of verbs, it is desirable to present the reader with the tenses, &c. of the substantive verb ׀וּס he was, and of אָ׀ is, which are peculiar in their forms and because the former is much used in the general conjugations.

The personal pronouns are frequently used in the place of the substantive verb after a participle, by which means the present tense of verbs may be expressed, as will be afterwards seen. We have also

the personal pronoun in such an instance as, הוּא טוֹב *he is good*. In these cases, אַתָּה and אֲנִי are employed in preference to אַתָּה and אֲנִי .

34. We come next to הִיא *is*, which is the same as the Hebrew הִיא . It takes the affixes in the following manner.

Person.	Plural.		Singular.		Gender.
1	אֲנִי	<i>we are</i>	אֲנִי	<i>I am</i>	com.
2	אַתָּם	<i>ye are</i>	אַתָּה	<i>thou art</i>	masc.
2	אַתְּךָ	<i>ye are</i>	אַתְּךָ	<i>thou art</i>	fem.
3	הֵם	<i>they are</i>	הוּא	<i>he is</i>	masc.
3	הֵנָּה	<i>they are</i>	הִיא	<i>she is</i>	fem.

If to הִיא with its affixes be joined the verb וָאָסַר , the imperfect tense will be formed; thus, $\text{וָאָסַרְתָּ$ *thou wast*, $\text{וָאָסַרְתָּ$ *he was*.

The verb הָיָה signifies *to have*, when it is followed by Lomad with the pronominal affixes; as, הָיָה לִּי *there is for me*, i. e. *I have*.

36. *Observations on Regular Verbs.**The Præterite.*

The first letter of the root is generally without a vowel, the second has for the most part ν ; but sometimes it has η ; especially in intransitive verbs and verbs denoting the affections, qualities, or sensations of the mind; as, עָסַף *he ceased*, לָחַץ *he blushed*, פָּרַץ *he cleaved*, נָדַם *he slept*, רָדַד *he trembled*, שָׁבַט *he laid down*, שָׁבַט *he inhabited*. Also verbs whose middle radical is Olaph; as, שָׁאַל *he enquired*, שָׁאַף *he was hoary*. Those also whose first radical is Yud have frequently η under the second; as, שָׂטַח *he set*.

The Yud of the feminine gender, third person, plural number is sometimes omitted and the verb is written as, שָׂטַחְנָה *they slew*, fem. The same occasionally happens to Vau of the masculine gender. The reason is that these letters are never pronounced.

Nun paragogic is added in some instances both to the masc. and fem. genders of the third person, plural number; but more frequently to the latter; as, שָׂטַחְנָה , שָׂטַחְנָה , third pers. plu. masc. and fem.

The force of this particle is supposed to be that of giving *energy* or *certainty* to the expressions in which it is found to occur.

Some verbs are found to have Olaph prosthetic; as, אָבַד *he found*.

The numbers and persons of this tense are formed by affixing a particle of one of the personal pronouns to the radical letters; thus, $\text{וְאֵלֶיךָ} \text{וְאֵלַי}$ for וְאֵלֶיךָ וְאֵלַי .

The Future.

This Tense seems to be formed in the active conjugations by prefixing certain abbreviated forms of the personal pronouns to the imperative mood; thus, וְאֵלֶיךָ for וְאֵלֶיךָ and וְאֵלַי ; וְאֵלֶיךָ for וְאֵלֶיךָ and וְאֵלַי .

In the passive conjugations the same forms are used instead of וְ of the particle וְ .

Verbs having ו under the middle radical of the præterite, in the future take ו ; as, וְאֵלֶיךָ ; those also whose third radical is a guttural or Rish take ו . A few verbs submit to no rule as to the vowels which they receive; thus, וְאֵלֶיךָ *I will receive*, which has the same vowels as the Heb. וְאֵלֶיךָ .

The second and third persons singular feminine sometimes admit Yud Otiose or paragoric at the end; thus, וְאֵלֶיךָ and וְאֵלַי .

The præformative letters are not four as in Hebrew; namely, וְאֵלֶיךָ ; but only three; namely, וְ . The third person sing. and plu. of both genders take וְ for וְ probably from וְ .

וַיִּשְׁמַע is the third pers. sing. masc. and the first person plu.; but the context will determine the person which is to be taken.

The verb שָׁמַע *he obeyed*, receives בָּ for אָ through the whole of the Ethpeel conjugation; except the infin. which is regular; thus, præt. שָׁמַעְתָּ imper. שָׁמַעְתָּ part. שָׁמַעְתָּ.

Infinitive.

The Infinitive of all the conjugations has Mem præformative. The Peal is masculine. The others have the termination ם and are feminine.

Imperative.

The observation on the vowel placed over the second radical of the future holds good in the imperative; as, עֲשׂוּ *make ye*, שָׁנוּ *sleep ye*. In the Ethpeel and Ethpaal conjugations, the middle radical has no vowel and under it is placed the *linea occultans*. This peculiarity has probably arisen from the general practice of people to utter a command in a hasty and an abrupt manner.

Nun paragogic is sometimes found with the forms of the imper. in the Peal, Pael and Aphel conjugations; as, שִׁמְעוּ for שָׁמַעוּ.

Participles.

The Participle active Peal is always written as שָׁמֵר without the Vau, which is inserted in the Hebrew participial noun Kal. This circumstance arises from Vau not being used with the vowel ם; but

with \aleph . On the contrary the passive participle has \beth with the vowel ε ; as, $\text{صَلَّيْ$. The participles of all the other conjugations are derived from the præterite by prefixing Mem. This letter is very probably a particle of the pronoun مَنْ , مَنْ , or مَنْ ; so that, صَلَّيْ is *he who slayeth*, i. e. *one slaying*. In the passive and Aphel conjugations the Olaph is omitted and its vowel taken by the Mem.

The part. صَلَّيْ sometimes takes the vowel ν on the first rad.; especially on intrans. verbs; as, $\text{لَمَّصِيْ$ *astonished*, Luke I. 21.

From this last remark ^{sub one} must be exempted some verbs of the Aphel conjugation, which retain the Olaph when another letter is prefixed; as, $\text{مَلَّيْ$ *permitting to live*. This is also the case in the future.

The Olaph of the Aphel conjugation is changed in the Ethtaphal into ζ ; as, مَلَّيْ for مَلَّيْ . This is likewise true in the whole conjugation.

37. The gutturals produce a few anomalies and only a few; for the Syrians have not so great a variety of vowel changes as the Hebrews. Verbs, the third radical of which is א , ב , ג or ד , have in the future and imperative Peal for the most part the vowel ν under the middle radical. In the other conjugations and the active participle Peal, they have ν in the place of \aleph ; as, مَلَّيْ *worshipping*, مَلَّيْ *glorying*, مَلَّيْ *he mocked*, مَلَّيْ *he commemorated*.

The verbs حَبَّرَ *he consoled*, كَلَّمَهُ *he defiled*, لَبَّسَ *he polluted*, in the Paal and Ethpaal conjugations, have the same changes of the vowels as the gutturals which are mentioned in the preceding paragraph.

38. The *Present Tense* is formed by the participles (form صَلَا) and the personal pronouns placed after them; thus,

Singular.

أَنَا	صَلَا	<i>I am slaying</i>
أَنْتَ	صَلَا	<i>thou art slaying</i>
أَنْتِ	صَلَا	<i>thou art slaying</i>
هُوَ	صَلَا	<i>he is slaying</i>
هِيَ	صَلَا	<i>she is slaying.</i>

Plural.

نَحْنُ	صَلَا	<i>we are slaying</i>	} masc.
أَنْتُمْ	صَلَا	<i>ye are slaying</i>	
&c.			
نَحْنُ	صَلَا	<i>we are slaying</i>	} fem.
أَنْتُمْ	صَلَا	<i>ye are slaying</i>	

The third pers. plu. is expressed simply by the act. part. in the plural number.

These auxiliary pronouns are sometimes contracted and affixed to the verb; as, أَنْتَ صَلَا , أَنْتِ صَلَا *thou art slaying*, second pers. sing. masc. and fem.

The substantive verb added to the participial form صَلَا will sometimes express the imperfect tense;

as, ܐܘܢܝܢ ܕܥܘܠܝܢ *he was slaying*. But if this verb be added to the præterite it will sometimes make the pluperfect tense; as, ܐܘܢܝܢ ܕܥܘܠܝܢ *he had slain*.

The pluperfect tense will not always be determined in this manner: for it sometimes happens that the auxiliary verb is thus found with the præterite, when the context will not permit it to signify the pluperfect tense. In such case the præterite or imperfect tense will be expressed.

IRREGULAR VERBS.

39. Large classes of verbs deviate from the foregoing paradigm of ܐܘܢܝܢ and present many irregularities in the process of conjugation. They are produced by nearly the same causes as in Hebrew; namely, by gutturals, which have been already noticed; by the letters ܢ ܐ ܢ , by the first radical being Nun; or by the second and third radicals being the same. Indeed the same classes of irregular verbs exist in the Hebrew, Chaldee, Syriac, Arabic and the whole of that family of languages.

We have seen that the verb ܐܘܢܝܢ is employed to designate the conjugations. The classes of irregular verbs

also are usually denoted for the sake of brevity by one of the letters in וּבָ; thus, "וּ", "בּ", "וּבּ", stand for verbs the first radical of which is וּ or בּ; "וּבּ", "בּוּ", "וּבּוּ"; those the middle radical of which is וּ, וּ or בּ; or the second and third radicals the same and finally "וּבּוּ", "בּוּבּ"; those the last radical of which is וּ or בּ.

40. Verbs "ו" or "ב".

1. In accounting for the anomalies which exist in this class; it is to be observed that Olaph or Yud beginning a word must have a vowel; as, וְאֵינִי *he was anxious*, בָּרַבְרָא *he begot*, and not וְאֵינִי, בָּרַבְרָא. See §. 5.

2. In the middle of a word Olaph or Yud and the preceding letter cannot be both without vowels. This is the consequence of what is stated in (1); for in those forms where two consonants without vowels come together; the Olaph or Yud would begin a syllable and would consequently require a vowel as much as at the beginning of a word.

3. This vowel of the Olaph or Yud is generally remitted to the preceding letter; but when an addition is made to the end of the word; to avoid the concourse of several letters without vowels; the Olaph or Yud retains its vowel; thus, בָּרַבְרָא *he was begotten*, וְאֵינִי *they were corroded*, וְאֵינִי *I was begotten*.

4. In the Aphel, Shaphel and their passive conjugations, the Olaph or Yud is changed into Vau which coalesces with the preceding ׀ and makes the diphthong *au*; as, אָכַלְתָּ, אָכַלְתְּ.

5. Olaph and Yud are dropped in the future first person singular; as, אֶכֶּלְךָ *I shall eat* for אֶכֶּלְךָ, אֶבְרַחְךָ *I shall beget*.

6. Verbs א are regular in the Pael and Ethpaal conjugations, which are therefore exceptions to (5).

7. In the Peal conjugation, the vowel of the Olaph is ׀ in the præteritum. In the pass. participle it is ׀. In the imper. in those cases where the second vowel is ׀, the first is ׀; as, אֶכֶּלְךָ *eat thou* masc.; but if the second vowel be ׀, the first is ׀; as, אֶכֶּלְךָ *say thou* masc. A similar rule is observed in the future tense; namely, when the second vowel is ׀ the first is ׀ and when the second is ׀, the first is ׀.

8. The Olaph in the Ethpeel and Ethpaal conjugations is sometimes changed into ׀; as, אָבַחְךָ from אָבַחְךָ *he took*, אָבַחְךָ *he lamented*. Indeed Olaph preceded by Thau is frequently changed into Thau for the sake of euphony.

9. Olaph or Yud in the middle of a word rests in general in ׀ or ׀. The latter is sometimes changed into the former.

The verb אָחַד *he departed*, makes its imperative mood of the Peal conjugation thus,

אָחַד אָחַד אָחַד אָחַד

The אָ of אָחַד has the *linea occultans* as often as it ought to have a vowel from the analogy of the regular verb, and Zain by the same rule is without one. In such cases the vowel of Lomad is remitted to Zain; as, אָחַד *she departed*.

In the passive part. Peal the radical ח in some verbs receives the vowel ו instead of י; as, נִלְמַד *taught*, Rom. ii. 18.

Yud in the verb חָטָא has no need of the vowel י; because the second radical is not pronounced and therefore its vowel is remitted to the first. In the imper. we have חָטָא.

The Yud remains in the Aphel conjugation in the verbs אָחַד *he ejaculated*, אָחַד *he sucked*.

אָחַד *he was faithful*, in the Aphel conjugation takes ח as the characteristic and א is changed into ח; thus, אָחַד *he believed*; so, Heb. אָחַד, Arab. اٰمَنَ.

Some verbs beginning with Yud reject this radical in the inf. and fut. Peal; as, יָדַע *he knew*, inf. יָדַע; יָדַע *he set*, fut. יָדַע.

41. Verbs "ع.

The anomalies belonging to this class of verbs are only few; the principal one is the rejection of Nun in certain situations and the rule is this; whenever Nun is at the end of a syllable and without a vowel according to the analogy of the regular verb, it is rejected. We have therefore fut. Peal **عَظُّوْا** *Ne-puk* for **عَظُّوْا** *Nen-puk*. inf. **عَظُّوْا** for **عَظُّوْا**.

In the imper. Peal, the Nun is thrown away at the beginning of the word; as, **عَظُّوْا** for **عَظُّوْا**. The reason of this elision is perhaps the difficulty of pronouncing it with rapidity in such a situation and it has therefore been neglected in writing.

The Ethpeel, Pael and Ethpaal conjugations of these verbs are quite regular in all their forms.

Verbs of this class are not found in the Shaphel and its passive conjugation.

The vowel of the second radical in the fut. and imper. Peal observes generally the same rule as regular verbs; thus, **عَظُّوْا** *he cut*, **عَظُّوْا** *he breathed*, **عَظُّوْا**

2. Vau for the most part takes the vowel ו or א . When therefore another vowel is required by the analogy of the regular verb; the Vau is taken away or changed into Olaph or Yud; as, $\text{וּחַ$ for וּחַו ; וּחַו for וּחַוּ .

3. In the Aphel conjugation, the Vau is changed into Yud; the vowel ו which belongs to Vau is also changed into י , and this vowel is remitted to the preceding letter; as, וּחַוּ for וּחַוּ .

There are some verbs, which preserve the ו in the Pael and Ethpaal conjugations; as, וּחַוּ *he disturbed*; וּחַוּ *he was disturbed*.

In the part. Peal the Vau is changed into Olaph and is pronounced Yud. When the third radical is a guttural or Rish; the vowel ו is changed into י . See §. 37.

Throughout the Ethpeel conjugation ל of the syllable ל is doubled, except in the 2nd pers. fut. This is the same as in Chaldee, except in the latter language the duplication is made by Dagesh forte.

The verbs of this class are not found in the Shaphel and Eshtaphal conjugations.

There are some verbs having the middle radical Vau, which are not conjugated after the paradigm; namely,

- (1) Those which have Olaph or Yud for the third radical; as, וּחַו *he was equal*, וּחַו *he adhered*.

- (2) Such verbs; as, **هَوَّبَ** *he desired*, **أَحْوَبَ** *he acted unjustly*.

In some verbs a difference of signification is marked by the middle radical Vau being moveable or otherwise; as, **بَوَّهَ** *it was white*, **بَوَّهَ** *he saw*.

Verbs having Yud for the middle radical letter, preserve it in some of the forms of the Peal conjugation; for instance, **حَبَّ** in the præterite.

Plural.	Singular.
حَبَّبُوا	حَبَّبَ
حَبَّبْتُمْ	حَبَّبْتُ
حَبَّبُوا	حَبَّبَ
حَبَّبْتُمْ	حَبَّبْتُ
حَبَّبُوا	حَبَّبَ

In the fut. Peal the preformative letters have no vowel except that which belongs to the first person singular.

From verbs of this class quadrilateral forms are frequently derived and make two additional conjugations; namely, Palpel and its passive Ethpalpal; as, **أَدَّأَى** *he made a commotion*, from **أَدَّأَى**, **أَدَّأَى** *he exalted*, from **أَدَّأَى**. See quadrilateral verbs.

In **بَبَّ** *he lived*, whenever a preformative is annexed, the Yud is taken away and its vowel remitted to the preceding consonant; as, inf. **بَبَّ** for **بَبَّ**.

43. Verbs "לָ .

There are a few anomalies in these verbs, but they are not so numerous nor of a kind to require a paradigm. Most of them may be accounted for on the principle stated in §. 40; namely, that *Olaph remits its vowel to the preceding letter which was previously without a vowel*. Agreeably to this law we have לָאֵ he was good, לָאֵ he was old, לָאֵ he enquired; imper. לָאֵ put on the shoe. So also in Ethpeel we have לָאֵ.

Olaph is sometimes placed before the first radical; we have indeed the following forms, לָאֵ, לָאֵ, לָאֵ, לָאֵ.

In Aphel we have, לָאֵ he did badly, לָאֵ he put on the shoes, לָאֵ he did well.

In Pael and Ethpaal conjugations Olaph is changed into Yud; as, לָאֵ he prepared, לָאֵ he was prepared.

44. Verbs יָ .

This class comprehends the two classes of Hebrew verbs terminating in נ and ה, and the three classes of Arabic verbs ending in ي و ا .

In the consideration of these verbs, we observe

1st. When they receive an addition to the end, the Olaph is either taken away or changed into Yud;

thus, אָלַע, אָלַע_x. This arises from the circumstance that Olaph is seldom found in the middle of a word beginning a syllable, or quiescent in the middle of a syllable.

2nd. Participles form the fem. gender according to the rules given in the Chapter on Nouns; as, אָלַע_f fem. אָלַע_f, אָלַע_f fem. אָלַע_f.

3rd. Olaph in the 3rd. pers. sing. præt. of all the conjugations, except Peal, becomes Yud quiescent in _x; as, אָלַע_x.

4th. The infin. is subject to the 1st. rule; but in other respects it is regular.

5th. In the imper. Peal and Ethpeal sing. masc., Olaph is changed into Yud; in the former it rests in _x, in the latter it makes a diphthong with _v; thus, אָלַע_x and אָלַע_v. But in the other conjugations Olaph remains and rests in _o. In the fem. _o makes a diphthong with _u. In the plural forms the 3rd. rad. is taken away in all the conjugations; thus, אָלַע_o אָלַע_o.

6th. In the fut. tense and participles, Olaph rests in _o; but before the affixes אָלַע and אָלַע it is taken away. Before the affix אָלַע Olaph passes into Yud moveable; as, אָלַע_o.

In the plu. præt. Peal of the third person we have אָלַע and אָלַע for אָלַע אָלַע. In a few in-

stances in the Philoxenian version the Olaph is preserved when the affixes are annexed to them; as, $\text{װֿװֿװֿ}^{\text{װ}}$ *they untied him*; Mark xi. 4.

Some verbs in Peal change Olaph into Yud and are declined as the præterite of the other conjugations; thus,

Plural.	Singular.
$\text{װֿװֿ}^{\text{װ}}$	$\text{װֿ}^{\text{װ}}$
$\text{װֿװֿװֿ}^{\text{װ}}$	$\text{װֿװֿ}^{\text{װ}}$

The verb $\text{װֿװֿ}^{\text{װ}}$ is not of the Aphel conjugation as is manifest from the vowel װ being under the Olaph. It is probably the Peal conjugation with Olaph prosthetic.

A few verbs of this class have װ in the sing. numb. masc. of the imper.; as, $\text{װֿװֿ}^{\text{װ}}$ *drink*.

In the 3rd. pers. plu. præt. and 2nd. pers. plu. imper. Peal, some verbs take the paragogic forms

$\text{װֿװֿװֿ}^{\text{װ}}$ $\text{װֿװֿװֿ}^{\text{װ}}$ $\text{װֿװֿװֿ}^{\text{װ}}$

45. Verbs ھ.

Verbs which have the second and third radicals the same lose the middle radical in the Peal, Aphel, Ethtaphal, Shaphel and Eshtaphal conjugations. The vowel of the middle radical expunged is remitted to the first. With the exception of this defect and a peculiarity in the act. part. Peal; the whole inflexion is quite regular. The Ethpeel, Pael and Ethpaal conjugations retain both the radicals and are in every respect regular. But for the two last conjugations the *Palpel* and *Ethpalpal* forms are most frequently used; as, ھه drew, ھه agitated, ھه magnified.

The imper. and fut. Peal receive on the second radical the vowel ʾ or ʿ, according to the rule laid down for these forms in the reg. verbs; thus, ھه he will spoil, ھه he will desire.

In the act. part. Peal the middle radical is changed into Olaph; but it is pronounced as Yud; thus, ھه is pronounced *Ro-yes* §. 11. When an addition is made to the end of this part.; the Olaph with its vowel is taken away; as, ھه, ھه. The verb ھه is an exception; for it preserves the Olaph in the plural; as, ھه masc. and ھه fem.

Verbs which have Olaph for the second and third radicals preserve both of them in inflexion; see *doubly irregular verbs*.

In the part. Aphel the middle radical is sometimes retained; but it has the *linea occultans*; as,  shadowing.

The Olaph characteristic of the Aphel conjugation is sometimes retained with the preformatives; as,  to love.

The Objective Affixes attached to Verbs.

46. We have already seen that different affixes are added to verbs to mark the *person* and *number*; besides these, others are frequently attached, which may be called the objective affixes; thus,  she has slain thee. If the verb be intransitive then it must be translated with some preposition to preserve its connection with the pronoun. We will first give a Table of these Affixes.

When a consonant precedes the affix.

It is only necessary to give examples of a regular verb; because irregular verbs receive the affixes in nearly the same manner. The chief exception consists in those verbs which have Olaph for the third radical; of which on account of some striking peculiarities particular notice must be taken in the proper places. It is also not necessary to extend the paradigm beyond the Peal conjugation: for the others are inflected like it. Whatever deviations there are will be given.

The first and second persons of both numbers through both the tenses do not take the objective affixes of the same person, otherwise the signification would be reciprocal which is usually expressed by certain conjugations.

In the præterite the third pers. plu. fem. has two forms لَمَّ and لَمَّ one the simple and the other the paragoric; each of them takes the affixes. There is also a masc. paragoric form لَمَّ .

Verbs of the second pers. plu. præterite of both genders do not receive the affixes لَمَّ and لَمَّ ; instead of them are used the separate pronouns لَمَّ and لَمَّ .

 you, masc., *يَهْلِكُنِي* you, fem., *يَهْلِكُنِي*
 him, *يَهْلِكُنِي* her.

Participles are seldom found with the objective affixes; when they are, the modification they undergo is the same as that for nouns.

48. Observations.

Præterite with Affixes.

It will be observed from the foregoing examples, that verbs and nouns have nearly the same vowel changes; thus, *يَهْلِكُ* when it takes the affixes emits the γ to ϵ ; which is similar to, *يَهْلِكُ*, *يَهْلِكُ*. In the other persons of the sing. the vowel is retained on the second radical to avoid three letters coming together without a vowel. In the third person plural of both genders the γ is put back on the first letter, ϵ receives α and ϵ of the fem. is taken away. The first and second persons plu. preserve both vowels unchanged.

Verbs having α for the second rad. retain it in those places where γ is found in *يَهْلِكُ*.

Verbs having Olaph or Yud for the first radical may be referred to *يَهْلِكُ*; for whenever ϵ is destitute of a vowel, there Olaph has α and Yud ϵ ; when ϵ has γ , Olaph and Yud have the same.

two consecutive letters can be at the same time subject to defect. It will be sufficient to consider a few instances of doubly irregular verbs, which may be divided into the following classes.

1st. Verbs with the first radical a Nun and the third Olaph; as, نَج *he injured*, Ethpeel, نَج , where Olaph is changed into Yud. Aphel نَج , where the final Nun is dropped; so, نَج *he tempted*, imper. Aph. نَج .

2nd. Verbs having the first and third radicals Olaph; as, ل *he came*, fut. Peal ل , which possesses the defects both of ل and ل .

3rd. Those with the first radical Yud and the third Olaph; as, ن *he swore*, ن *I have sworn*, ن *he will swear*, ن *to swear*.

4th. Verbs having the second and third radicals Olaph. ن *he forbade*, whence 3rd. pers. præter. plu. ن inf. ن imper. ن . ن *he laboured*, Aph. ن *we will make thee wearied*.

ن *it is fit*, and a few others are altogether defective and anomalous.

50. Quadriliteral Verbs.

The Syrians have some verbs composed of more than three letters; they are not numerous, and as in Hebrew and Arabic, are chiefly derived from triliteral

roots. They are formed by the addition or repetition of a letter, and undergo little or no alteration when the prefixes and affixes are annexed.

I. By the repetition of one or two of the letters of the trilateral root, and chiefly in those cases when the second and third radicals are the same, or the middle radical Vau; see § 42, 45; thus,

سَلَسَلَ he dragged along, from سَلَسَ he dragged,
سَلَسَلَسَ he was exasperated, from سَلَسَ he was bitter.

فَعَفَفَ he did often, or practised, from فَعَفَ he did,
or made. اِنْبَغَبَ he was made, or became lazy, from
بَغَبَ he was lazy. It will be seen from these and
the following examples, that the general effect of the
duplication is to give increased intensity to the signi-
fication of the original word.

II. Instances of two of the radicals being repeated,
are اَلْمَلَمَلَةُ he dreamed for a long time, from مَلَمَ
he dreamed, اَلْمَلَمَلَةُ he stained, from مَلَمَ he
exalted, from مَلَمَ he was high.

III. Some appear to be compounded of two verbs;
as, اَلْمَلَمَلَةُ he thought basely, from مَلَمَ he was base,
and اَلْمَلَمَلَةُ he quarreled.

IV. By the addition of a letter to the beginning
of a word.

are اَلْمَلَمَلَةُ he dreamed for a long time, from مَلَمَ
he dreamed, فَصَفَ he stained, from فَصَّ, اِنْبَغَبَ he
exalted, from بَغَبَ he was high.

III. Some appear to be compounded of two verbs;
as, اِنْبَغَبَ he thought basely, from بَغَبَ he was base,
and اِنْبَغَبَ he quarreled.

IV. By the addition of a letter to the beginning
of a word.

(1) و; as, فَكَّرَ he made poor, فَكَّرَ he became poor, from the Arabic سَكَنَ he was poor.

(2) ه; as, هَضَبَ he hastened, he burned, from هَضَبَ.

(3) ل; as, عَلَّمَ he taught, from عَلَّمَ he learned.

The letter Vau is sometimes inserted in the middle of a word; as, حَمَّصَ he twisted, حَمَّصَ he was perplexed, from the root حَمَّصَ he bound; هَمَّصَ he expected, from هَمَّصَ.

Sometimes we have ب; as, صَبَّأَ from صَبَّأَ. و; as, صَبَّأَ he persevered, from صَبَّأَ he was strong. ذ; as, حَبَّأَ and حَبَّأَ he revolved.

At the end of a word we find sometimes the letter ب; as, صَبَّأَ he made domestic, صَبَّأَ he was treated familiarly, from صَبَّأَ a house, صَبَّأَ he subdued, from صَبَّأَ under, beneath.

It is unnecessary to give more examples; we will only observe that in the process of conjugation, these verbs follow in general the principles laid down for trilaterals.

51. PARTICLES.

Under this term may be comprehended words which are used in explaining, modifying and connecting the principal parts of a sentence. They embrace, therefore, Adverbs, Prepositions, Conjunctions and Interjections.

Adverbs.

1st. Of time.

أَصْبَحًا *once, together*, إِذَا *when?* الْيَوْمَ *yesterday*, فِي الْآخِرِ *in the end, at length*, بَعْدَ ذَلِكَ *afterwards*, تَتْبَعُ *then*, سَاعَةً *now*, الْيَوْمَ *to-day*, حَالِيَةً *already, now*, قَبْلَ *before*, فَوْرًا *immediately*, غَدًا *to-morrow*, فِي أَيِّ زَمَانٍ *at any time*, لَمْ يَكُنْ *not yet*, مَا دَامَ *as long as, how long?* حَتَّىٰ *until now*, مُجْزِئًا *suddenly*.

2nd. Of place.

أَيْنَ *where?* هُنَا *here, hither*, مِنْ هُنَا *hence*, إِلَىٰ *whither? which way?* حَتَّىٰ *hitherto*, هُنَا *thither*.

Adverbs of various kinds.

كَيْفَ *how?* كَثِيرًا *greatly, powerfully*, وَحِيدًا *only*, أَيْضًا *especially, more*. حَقًّا *truly*, أَكْثَرَ *more*, سَرِيعًا *quickly*, قَلِيلًا *little*, نَدِيمًا

swiftly, مَبْرُورٌ *formerly*, لَمَّا (for لَمَّا as I have said) *namely, especially*, أَيْ *so*, أَمْ *whether?* أَيْحَقٌّ *truly*, أَيْنَ *where?* which is formed from the adverb لِمَا, and the personal pronoun سِ، مِنْهُ *from thence*, مِنْ *from whence?* أَيْمًا *now*, بَرِهَانٌ *in vain*, كَيْفَ *wholly*, حَقٌّ *effectually, really*, لَيْسَ، أَمْ *not*, أَمْ لَيْسَ *not?* *lastly*, *first*, *secondly*, *divinely*, *justly*.

Prepositions.

Some prepositions are prefixed to verbs, nouns &c., and others are separate words. Those most commonly used are فِي *in*, إِلَى *to*, مَعَ *to, with*, مِنْ *from*, بَيْنَ or بَيْنَهُ *between*, خَلْفَ *without*, بِغَيْرِ *without*, بَعْدَ، بَعْدَهُ *after*, لِمَا، لِمَاكَ *for*, عَنْهُ، عَنْهُ *about*, ضِدَّ *against*, لِأَنَّ *because of*, عَلَى *upon or against*, مَعَ *with*, قَبْلَ *before*, قَرِيبَ *near*, ضِدَّ *against*, قَبْلَهُ *before*, تَحْتَ or تَحْتَهُ *under*.

Conjunctions and Interjections.

These are أَوْ *or*, أَمْ، أَمْ، أَمْ *as*, أَلَّا *but*, إِنْ، إِنْ *if not, unless*, إِنْ، إِنْ *if*, إِنْ، إِنْ *if not*, إِنْ، إِنْ *if*, أَيْضًا *also*, سِوَى *besides*, أَمْ، أَمْ *but yet, however*, *γάρ*

for, ۛ as, because, ۛۛ but, ۛۛ lest by chance,
 ۛۛ therefore, ۛ and, ۛۛ when, ۛۛ therefore, ۛۛ
 truly, ۛۛ when, ۛۛۛ, ۛۛۛ therefore, ۛۛۛ before
 that, ۛۛ until, ۛۛ also.

The Interjections are ۛۛ behold, ۛۛ, ۛۛ O! ۛۛۛ,
 ۛۛ O that! ۛۛ woe! ۛۛۛ I pray.

SYNTAX.

52. *Syntax of Nouns.*

THE noun which is put in a state of construction must precede that which qualifies it or limits its signification; thus, $\text{בְּחֶמְרָהּ} \text{אִמּוֹתָיו}$ *the womb of his mother*, $\text{בְּחֶמְרָהּ} \text{אִמּוֹתָיו}$ *division of my goods*. This is the reverse of what takes place in Greek and Latin, where the second noun is the one whose form is modified and this modification is termed the genitive case.

A noun is often found in the constructive for the absolute state, when it is followed by another having a preposition prefixed; as, $\text{קַבְּלֵי} \text{פָּנִים}$ *acceptors of faces*, i. e. *hypocrites*; where we have קַבְּלֵי for קַבְּלֵי Matth. xvi. 3. $\text{בְּרֵכָה} \text{בְּיַמֵּי} \text{נְשִׂאֵי}$ *blessed among women*, where we have בְּיַמֵּי for בְּיַמֵּי Luke i. 28. $\text{מְרִיבֵי} \text{חַיְלָה}$ *denying kindness* i. e. *ungrateful*, מְרִיבֵי for מְרִיבֵי 2 Tim. iii. 2. The preposition is sometimes separated from the noun; as, $\text{בְּיַמֵּי} \text{מְרִיבֵי}$ 1 Tim. i. 10, where we have מְרִיבֵי for מְרִיבֵי .

The definite state in its primary office is undoubtedly intended to express a definite sense, i. e. it is used to direct the attention to a particular object or objects known either by their universality, preeminence or described previously by some circumstance; as, $\text{הָאֵלֶּה} \text{ הָיָא} \text{ הַשָּׁעֵרָה}$ *the hour was come*, $\text{אֲנִי} \text{ הַיַּיִן}$ *I am the vine*. It occurs in all the cases where the Hebrew article is used, as may be observed by comparing the Hebrew Bible with its Syriac version. From the same comparison, it may be also seen that syr. nouns are put in the def. state in numerous instances where the Hebrew article in the corresponding words is omitted.

The def. state is very frequently found, where in Hebrew the constructive would be employed; in such cases ܘܢܝܢܐ is usually prefixed to the following word; but not always; as, $\text{ܘܢܝܢܐ} \text{ ܕܥܝܘܒ}$ *feast of the passover*, John xiii. 1. $\text{ܘܢܝܢܐ} \text{ ܕܥܘܠܐ}$ *the glory of God*, John xi. 4. see § 21. This construction may be equivalent to $\text{אֲנִי} \text{ הַיַּיִן}$ in Hebrew, which serves sometimes as a circumlocution for the constructive state.

The proper names of men do not admit a definite state. A few appear to have it, because they terminate with the radical Olaph; as, $\text{ܘܢܝܢܐ} \text{ ܕܥܝܘܒ}$ *Peter*; but such nouns are in the absolute state.

A plural of excellence the Syrians have not; except a few instances which are found in the ver-

sion of the Old Testament, and which may be consequently regarded as Hebraisms. See Ps. v. 1.

The repetition of a noun sometimes denotes diversity, or a multitude; as, لُغَةً لُغَةً *with divers tongues*, Acts x. 46; $\text{أَوْقَاتٍ أَوْقَاتٍ}$ *in various times*, John v. 4; $\text{بِأَسْفَالٍ كَثِيرَةٍ}$ *affected with many evils*, Mark ii. 17. It denotes also a distributive sense; as, $\text{بِنَيْسَانٍ بِنَيْسَانٍ}$ *each a penny*, Matth. xx. 9.

In the Philoxenian version some diminutive nouns are found. They are denoted by the termination عٌ or هٌ ; as, بْنٌ عٌ *a little son*, رَجُلٌ عٌ *a little man*, مَنْبَعٌ عٌ *a small fountain*; رَجُلٌ هٌ *a little man*, أَمْتٌ هٌ *a little lamb*; كَلْبٌ هٌ *a little dog*. There is no doubt that عٌ is the same as the Greek termination *ov*, and that هٌ is identical with the Latin ending *us*.

53. Construction of Adjectives.

Adjectives, whether they are used as qualifying words, or whether they are employed as prædicates, agree generally with their substantives in gender and number. The exceptions to this rule are the same as in Hebrew.

When an adjective has the office of the prædicate, the logical copula being expressed or understood, it is put in the absolute state with the same gender and number as its substantive and before it; as, كَبِيرٌ شَرٌّ كَبِيرٌ شَرٌّ *my sin is greater than* Gen. iv. 13.

An adjective is usually found after the substantive, which it qualifies; as, $\text{רוּחַ אֲשֵׁרָא} \text{ } \text{הַבְּטֵהוּ}$ *the unclean spirit*. Some exceptions to this rule exist: when an adjective is made the important word in the sentence, it takes precedence of its substantive.

When several substantives come together, and an adjective or participle added to them, it is placed in the plural number and masc. gender. See Rom. xvi. 21.

The word כֻּלָּם *all* is placed before its substantive, and indulges in a pleonastic use of the pronominal affixes; as, $\text{כֻּלָּם חָרַסוּהוּ}$ *all the multitude*, Acts xv. 12. $\text{כֻּלָּם חָרַסוּהוּ}$ *all the chief priests*, lit. *all of them the chief priests*, Matth. ii. 4. $\text{וַיִּקַּח אֵת כָּל־אֲסִיָּא$ *and he took all Asia*, Bar. Heb. p. 39.

54. Numerals.

Cardinal numbers sometimes precede the thing numbered, and sometimes follow it. The rule appears to be, to place the emphatic word first in the sentence; as, $\text{שְׁנַיִם אָנְשִׁים}$ *two men*, Acts i. 10. $\text{שֵׁשׁ יְאֻדָּיִם בְּרִיאֵי אֶבֶן}$ *six water pots of stone*, John ii. 6. So also when thousands are to be numbered, the same observation applies to the numeral which numbers them; as, $\text{חֲמֵשָׁתָּה אַלְפֵי}$ *five thousand*, Mark vi. 44. and אֶלְפֵי שֵׁשׁ Matth. xiv. 21.

Cardinal numbers are frequently found to occupy the place of ordinals. In Luke i. 59. we have $\text{בְּיֶמֶת הַיּוֹם הַשְּׁמִינִי}$ lit. *the day which is eight*, i. e. *the eighth day*; so

also, $\text{שָׁלֹשׁ שָׁעָה} \text{ } \text{שָׁעָה}$ in three hours, i. e. in the third hour, Matth. xx. 3; $\text{שֵׁשׁ שָׁעָה} \text{ } \text{שָׁעָה}$ six hours, i. e. the sixth hour, Matth. xv. 33. In many places cardinal numbers are used for ordinals, and the noun numbered precedes in the constructive state; as, $\text{שָׁנָה אֶחָדָה} \text{ } \text{בְּ} \text{ } \text{שָׁנָה}$ to the first year, lit. the year of one, Dan. i. 21. $\text{שָׁנָה אֶחָדָה} \text{ } \text{וְ} \text{ } \text{שֵׁשׁ} \text{ } \text{מֵאוֹת} \text{ } \text{שָׁנָה}$ lit. in the year of six hundred and one, i. e. in the six hundredth and first year, Gen. viii. 13. $\text{שָׁנָה אֶחָדָה} \text{ } \text{וְ} \text{ } \text{רִבְעִיתָא} \text{ } \text{שָׁנָה}$ six hundredth and fourth year, Bar. Heb. p. 100. The noun שָׁעָה is occasionally expressed after the numeral; see Gen. vii. 11. A cardinal number is in a few instances put before its noun in the constructive state; as, in Matth. iv. 25. we have עָשְׂרֵי עָרִים ten cities, lit. a decad of cities.

In designations of weights and measures, the noun which expresses the weight, &c. is sometimes omitted, though not so frequently as in Hebrew; as, אֶלֶף שֵׁקֶל a thousand (shekels) of silver, Gen. xx. 16; where the word כֶּסֶף is understood.

55. Syntax of Pronouns.

The logical copula, as has been already stated, is frequently expressed by one or other of the personal pronouns, and that with the *linea occultans*: as, $\text{אֲנִי} \text{ } \text{אֲנִי}$ I am, $\text{אֲנִי} \text{ } \text{וְ} \text{ } \text{אֲנִי} \text{ } \text{לְ} \text{ } \text{תַלְמִידֵי} \text{ } \text{אֲנִי}$ we are disciples. But when existence is meant, the substantive verb is used, and this without the *linea occultans*; as, $\text{חַי} \text{ } \text{בְּ} \text{ } \text{חַי} \text{ } \text{בְּ} \text{ } \text{חַי}$ in him was life, John i. 4.

The pronouns *he himself* and *the same*, the Syrians have not, but they are expressed by a little circumlocution; as,

1. By a repetition of the personal pronoun with the particle כִּי placed between; as, כִּי, כִּי, וְכִי כִּי, וְכִי *these same sacrifices*, Heb. x. 1.
2. By the juxta-position of the pronouns וְכִי, וְכִי ; as, $\text{וְכִי, וְכִי, וְכִי, וְכִי}$ *and that same day was the sabbath*, John v. 9.

An affix annexed to the word כִּי is frequently employed as a possessive pronoun, §. 28; when the sentence would be rather ambiguously expressed by placing the affix to the noun or the verb; as, כִּי, וְכִי *thine is the kingdom*, Matth. vi. 13; כִּי, וְכִי *he came to his own and his own received him not*, John i. 11. These possessive pronouns serve also to give a particular energy to the word to which they belong; thus, כִּי, וְכִי *my time*, John vii. 8.; this is especially the case when the affix is likewise added to the noun; as, כִּי, וְכִי *my words*, John v. 47.; כִּי, וְכִי *in thy eye*, Luke vi. 42.; כִּי, וְכִי *my meat*, John iv. 34.

A pronoun is in some instances found before the noun to which it refers, and is placed at a considerable interval from it; thus, כִּי, וְכִי

its foundations are in his holy mountain, Ps. lxxxvii. 1, i.e. *the foundations of the earth*. 𐤊𐤍𐤊𐤃 occurs in v. 2. Such construction exists principally in the version of the Old Testament, and on that account may perhaps be regarded merely as a Hebraism.

An interrogative is sometimes preceded by a noun in the constructive state; as, 𐤍𐤁𐤀 𐤍𐤊𐤃 *the daughter of whom art thou?* Gen. xxiv. 23.; or which is equivalent to it, the def. state of the noun is used, and Dolath prefixed to the interrogative; as, 𐤍𐤁𐤀 𐤍𐤊𐤃 𐤍𐤁𐤀 *from the hand of whom have I received?*...1 Sam. xii. 13.

An oblique case of the relative Dolath is indicated by connecting with the Dolath a personal pronoun put in that case; as, 𐤍𐤁𐤀 *to him*, 𐤍𐤁𐤀 *to her*, 𐤍𐤁𐤀.....? *to whom*, 𐤍𐤁𐤀.....? *to whom*; 𐤍𐤁𐤀 𐤍𐤁𐤀 *to them*, 𐤍𐤁𐤀 𐤍𐤁𐤀.....? *to whom*, 𐤍𐤁𐤀 *in him*, 𐤍𐤁𐤀.....? *in whom*, 𐤍𐤁𐤀 𐤍𐤁𐤀 *in them*, 𐤍𐤁𐤀 𐤍𐤁𐤀.....? *in whom*.

56. Syntax of Verbs.

Agreement of the Verb with its Subject.

A verb agrees with its subject in gender, number and person; as, 𐤊𐤍𐤊𐤃 *Jesus came*, 𐤍𐤁𐤀 𐤍𐤁𐤀 *Mary anointed*, 𐤍𐤁𐤀 𐤍𐤁𐤀 *the disciples asked*.

Nouns which are used only in the plural number, will receive a verb either in the sing. or plu.; as, 𐤍𐤁𐤀 𐤍𐤁𐤀

in him was life, John i. 4; $\text{וְהַיְהוּדִים לֹא יָדְעוּ אֵיךְ הָיָה יְהוֹשֻׁעַ בְּיָמָיו}$
and the life is the light of men, same place. The former
 is grammatically termed *constructio ad sensum*, and the latter
constructio ad formam. Several other exceptions are found
 to the foregoing general rule, which although not so fre-
 quent, are of much the same character as those which exist
 in Hebrew.

When several substantives come together, the verb belong-
 ing to them is put in the plu. numb. masc. gender.

Occasional uses of the Tenses.

Events of future occurrence, which are considered
 as certain to happen, have this certainty represented
 by the verb being placed in the præterite tense; as,
the people sitting in darkness shall see
(have seen) great light, Isaiah ix. 1. $\text{וְיֵשְׁבְעוּ בְּחֹשֶׁךְ וְרָאוּ גְדֹלָה$
 $\text{וְיָבִיאוּ מִיָּד מוֹתוֹת וְיָבִיאוּ מִיָּד חַיִּים}$
he cometh not to con-
demnation, but shall pass from death to life, John
 v. 24.

There are a few instances in which the præterite
 of the verb וָעָשָׂה , followed by a participle or an adjective,
 represents the imperative; as, $\text{וְעָשָׂה אַתָּה כְּעָשָׂה אֲנִי}$
 $\text{וְעָשָׂה אַתָּה כְּעָשָׂה אֲנִי}$
go thou also (and) do the same, Luke x. 37. This
 application of the tense is undoubtedly to give emphasis
 to the sentence. For as a præterite is employed to
 express our belief that some future event will certainly
 take place, so is it readily seen that on the same prin-
 ciple this tense may be regarded as the emphatic form
 of the imperative, whenever it is so applied.

The tenses, especially the future, either alone or in connection with one or more particles in many cases express a potential, subjunctive, or hypothetical sense.

لَا صَيِّدُكُمْ *if ye had saved them alive I would not slay you*, Jud. viii. 19; أَجِبْ إِنِّي *although I should walk*, Psal. xxiii. 4; مَن يَقْدِرُ *who can say?* Prov. xx. 9. But the participle with the præterite of the substantive verb is perhaps more frequently employed for these purposes; as, لَوْلَا تَدْرِكُ *if thou hadst known*, John iv. 10.

Use of the Infinitive.

An infinitive connected with a finite verb adds intensity to it, or denotes what is signified by the verb to be *certain, fixed or continual*; as, كَثُرَتْ أَهْلِي *I will greatly multiply*, Gen. xxii. 17.; لَنْ مَمُوتَ لَمَمُوتَ *ye shall not surely die*, Gen. iii. 4.; كَانَتْ مَكُونًا *hath been accurately depicted*, Gal. iii. 1.

When an infinitive is governed by some verb signifying *will, power or command*, it has generally ʾ prefixed; as, *and how are we able to know the way?* John xiv. 5.; *he sent him to feed swine*, Luke xv. 15.; *and he wished to slay him*, Matth. xiv. 5.

Use of the Imperative.

The imperative is not only employed to express a *command*, but also an *exhortation*, *admonition* or a *permission*; as, John xi. 15., $\text{لَئِيْذْا لَئِيْذْا}$ *let us go thither*; see also Mark i. 38.

The imper. of the verb لَئ is frequently found in connection with a finite verb in the fut. tense; thus, $\text{لَئِيْذْا لَئِيْذْا}$ *and now come we will make a covenant*, i. e. *and now come let us make a covenant*, Gen. xxxi. 44; $\text{لَئِيْذْا لَئِيْذْا}$ *come we will go*, John xi. 7.

We have also the imper. in such constructions as the following; *I will give you the best of the land of Egypt*, $\text{لَئِيْذْا لَئِيْذْا}$ *and eat ye the fat of the land*, Gen. xlv. 18.; $\text{لَئِيْذْا لَئِيْذْا}$ *this do and live*, i. e. *this do and ye shall live*, Gen. xlvi. 18.

Participles.

The participle is timeless; i. e. it has no time of its own; but partakes of every time with which it may be connected. Thus, pres. most frequently. The fut.; as, $\text{لَئِيْذْا لَئِيْذْا}$ *Therefore that which shall be born of thee is holy*, Luke i. 35. $\text{لَئِيْذْا لَئِيْذْا}$ *thy wife shall bear to thee a son*, Gen. xvii. 19. The Præt.; as, *Behold their Lord*, $\text{لَئِيْذْا لَئِيْذْا}$ *fallen and dead*, Judges iii. 25. Participles, when they are taken as such, and

not for the present tense, have placed before them for the most part, the particle و or the prefix و ; as, $\text{وَالْمُتَّوِّجِينَ مِنْ بَيْتِهِمْ يَتَّوِّجُونَهُمُ} \text{ } \text{و}$ *wandering from house to house*, 1 Tim. v. 13.

The active participles are in some instances found in the constructive for the absolute state. In such cases they are followed by a noun; as, $\text{وَالسَّابِقُونَ السَّابِقُونَ} \text{ } \text{و}$ *descending into the ditch*, Prov. i. 12. $\text{وَالْمُدْخِلُونَ فِي الْبَابِ} \text{ } \text{و}$ *entering in at the gate*, Gen. xxiii. 10. $\text{وَالسَّابِقُونَ} \text{ } \text{و}$ *he saw Levi sitting*, Mark ii. 14.

Regimen of Verbs.

A transitive verb exercises an influence over a noun or pronoun which follows it, either *immediately* or *mediately* and which limits its signification. The noun or pronoun may be without or with a preposition; as, $\text{وَالَّذِينَ كَفَرُوا} \text{ } \text{و}$ *he made many disciples*, John iv. 1. $\text{وَالَّذِينَ كَفَرُوا} \text{ } \text{و}$ *What has Moses commanded you?* Mark x. 3. $\text{وَالَّذِينَ كَفَرُوا} \text{ } \text{و}$ *that I may call the righteous*, Mark ii. 17.

Verbs which are doubly transitive; such as transitive verbs in those conjugations which are causative, exercise this influence over two such nouns or pronouns; as, $\text{وَالَّذِينَ كَفَرُوا} \text{ } \text{و}$ *he commanded him to be clothed with a garment of fine linen*, Gen. xli. 42. $\text{وَالَّذِينَ كَفَرُوا} \text{ } \text{و}$ *he taught the people knowledge*, Eccles. xii. 9.

Verbs used for Adverbs.

It is not uncommon to see a verb put before another verb to which it performs the office of an adverb; as, *אֲשִׁיב מְּוֹלָא* *who has taken much*, 2 Cor. viii. 15. *אֲשִׁיב זְמַנְכֶם* *hath greatly exalted him*, Phil. ii. 9. *אֶסְפְּרָא אִנְדָא חֻנְרָא* *I will again feed thy flock*, Gen. xxx. 31. *אֲמַרְתִּי אֲמַרְתִּי מַלְלָא* *Again he spake a parable*, Luke xix. 11. *אֲמַרְתִּי אֲמַרְתִּי אֲמַרְתִּי* *that it should not be spoken to them any more*, Hebr. xii. 19. *אֲמַרְתִּי אֲמַרְתִּי אֲמַרְתִּי* *he changed the letter craftily*, Bar. Heb. p. 100.

Miscellaneous Observations.

The ordinary method of expressing a reciprocal or reflexive sense is by a transitive verb with the noun *נֶפֶשׁ* united to the affixes. But it is also in some instances done by means of the passive conjugations; as, *אֲשִׁיב* *he turned himself*, Matth. ix. 22. See also John viii. 6, 7, 59.

Neuter verbs have sometimes a passive signification; as, *אֲשִׁיב* *to wander for to be deceived*, *πλανασθαι*, Luke xxi. 8. *אֲשִׁיב* *he burnt for was burnt*, Matth. xiii. 30. *אֲשִׁיב* *he fell for he was cast down*, John iii. 24. *אֲשִׁיב* *he ascended for was extracted, was torn up, as trees which are torn up by their roots.*

Compound words in Greek are translated into Syriac, by simple words, either alone or in conjunction with another word or particle; as, ܢܦܝܥܝ *foreknowing*, Acts xxvi. 5.; ܘܢܦܝܥܝܐ ܘܢܦܝܥܝܐ *I predicted*, Mark xiii. 23.; ܘܢܦܝܥܝܐ *he ran before him, or did outrun him*, John xx. 4.; so with many others.

57. *Syntax of Prepositions.*

Prepositions are employed in connection with verbs; thus, ܘܥܝܢܝܐ is found with verbs signifying *to confess* or *deny*, also many verbs of sense are construed with ܘܥܝܢܝܐ ; as, ܘܥܝܢܝܐ ܕܢܦܝܥܝܐ *who shall confess me*, ܘܥܝܢܝܐ ܕܢܦܝܥܝܐ *who shall deny me*, ܘܥܝܢܝܐ ܕܢܦܝܥܝܐ *let me not see his death.*

The preposition ܘܥܝܢܝܐ is used with verbs of *entering* or *ascending*; as, ܘܥܝܢܝܐ ܕܢܦܝܥܝܐ *whoever does not enter by the door*, John x. 1, 2.

ܘܥܝܢܝܐ with verbs of *covering* or *commanding*; as, ܘܥܝܢܝܐ *he covered*, Matth. xvii. 5. ܘܥܝܢܝܐ *he commanded*, 2 Chron. xxxvi. 23.

ܘܥܝܢܝܐ with verbs of *separating* or *distinguishing*; as, *God separated* ܘܥܝܢܝܐ ܕܢܦܝܥܝܐ *between the light and the darkness*, Gen. i. 4.

ܘܥܝܢܝܐ with verbs of *coming*; as, ܘܥܝܢܝܐ *he came*, Mark i. 7.; of *going*, as, ܘܥܝܢܝܐ *he departed*, John vi. 2. ܘܥܝܢܝܐ *he run*, 1 Cor. xiv. 1.

The prepositions ܠܗܘܢ *against*, ܠܝܢ *against*, ܡܝܬ *with*, and many others are frequently used with verbs; as, $\text{ܘܠܗܘܢ ܠܗܘܢ ܠܗܘܢ ܘܠܗܘܢ}$; *resist not evil*, see also Matth. xxvi. 62.; Acts iv. 14.; Rom. vii. 23.; Acts xxv. 5.; Hebr. vi. 6., &c.

58. Syntax of Particles.

The repetition of adverbs like that of nouns expresses intensity; as, ܘܠܗܘܢ ܘܠܗܘܢ *very badly*; or diversity, as, ܗܘܢ ܗܘܢ *here and there*; or continuation; as, ܘܠܗܘܢ ܘܠܗܘܢ *by little and little*.

Adverbs sometimes qualify nouns by being placed before them in the constructive state; as, ܘܠܗܘܢ ܘܠܗܘܢ *a little water*, ܘܠܗܘܢ ܘܠܗܘܢ *a few days*.

The particle ܘܠܗܘܢ placed before adjectives assigns a privative signification to them; as, ܘܠܗܘܢ ܘܠܗܘܢ *foolish*, ܘܠܗܘܢ ܘܠܗܘܢ *immortal*.

Interjections, which denote threats, for the most part cause ܘܠܗܘܢ to be prefixed to the next word; as, ܘܠܗܘܢ ܘܠܗܘܢ *woe to us!*

ܘܠܗܘܢ *far be it* is construed with ܘܠܗܘܢ of the person, and ܘܠܗܘܢ prefixed to the verb; as, ܘܠܗܘܢ ܘܠܗܘܢ ܘܠܗܘܢ *far be it from him that he should do*, Job xxx. 10.

59. Enallage of Persons and Number.

The enallage of persons does not occur so frequently in Syriac as in Hebrew, and especially as in the Hebrew

Psalms; but some instances are met with in the Syriac Scriptures; as, $\text{ܘܠܐ ܫܘܒܐ ܕܢܘܨܘܢܐ ܕܘܢܐ ܕܘܢܐ ܕܘܢܐ}$ *wherefore thou art inexcusable, O man, who judgeth his neighbour*; where we have ܘܢܐ for ܘܢܐ ܘܢܐ Rom. ii. 1. i. e. the 3rd person for the 2nd. Also the 1st for the 3rd in Mark xii. 37. ܘܢܐ ܕܘܢܐ ܕܘܢܐ *therefore David himself calls him my Lord*, where we have ܘܢܐ for ܘܢܐ ܘܢܐ *his Lord*.

Enallage of number we have in Hab. ii. 15.

60. Ellipsis.

This figure occurs the most frequently in the omission of the substantive verb; as, ܘܢܐ ܘܢܐ ܘܢܐ *and his name was Joseph*; ܘܢܐ ܘܢܐ ܘܢܐ *those who (are) like him*, Bar. Heb. 328. 12. There are other words which it is sometimes necessary to supply in order to complete the sense; as a subs. in Eccles. vi. 3. ܘܢܐ ܘܢܐ ܘܢܐ *if a man shall beget a hundred, namely sons*. ܘܢܐ ܘܢܐ ܘܢܐ *once have I sworn*, where ܘܢܐ is understood, Ps. lxxxix. 35. ܘܢܐ ܘܢܐ ܘܢܐ *I eat not that which is acquired by fraud and force*, Isaiah i. 22.

APPENDIX.

IT is stated in §. 10, that a simple point is sometimes used for various purposes. The practice of the Syriac writers appears to have been to employ a point, which by its position above or below the letter to which it is annexed, would determine the true signification of a word that would otherwise, in the absence of the vowels, remain ambiguous. It is probable that the signification of this point defined in some degree the kind of vowel intended to be supplied, and thus served as a guide in the pronunciation. The following instances of its application, taken principally from the Grammars of Amira, Hoffman and De Dien, will illustrate the nature and utility of this sign.

{	ܐܢܐ	ܐܢܐ ⁷	<i>who?</i>
	ܐܢܐ	ܐܢܐ _x	<i>hand.</i>
{	ܐܠܝ	ܐܠܝ ^o	<i>coming.</i>
	ܐܠܝ	ܐܠܝ ^h	<i>he came.</i>
	ܐܠܝ	ܐܠܝ ^u	<i>a sign.</i>
{	ܨܒܘܐ	ܨܒܘܐ ⁷	<i>wretched.</i>

It appears from the foregoing examples that this point performed the office of vowels; that when it was placed above the letter, it denoted for the most part one of the vowels γ , ρ , and when beneath the letter, it denoted α , η , or λ .

This point was further used to distinguish the persons and tenses of verbs. When it was put beneath the letter, it denoted

1. All the persons of the præterite, the first of the sing. numb. being excepted. The third person sing. fem. has this point frequently on the left-hand side of the last letter ζ .

2. The imperative and infinitive whenever any point is found.

3. All persons of the future, the first of each number being excepted.

When it is placed above a letter in verbs it denotes

1. The first person of the præterite.

2. The active participle; as in Peal conjugation فَعْلٌ فَعْلٌ , Paal فَعْلٌ فَعْلٌ ; unless one of the letters ا و ي requires it to be placed below; as, فَعْلٌ or فَعْلٌ .

3. The first person of both numbers of the future.

The following paradigm of the Peal conjugation of فَعْلٌ will exemplify what has been now stated.

Præterite.

22. חַיָּה חַיָּה house of the dead, for sepulchre, pass. part. plu. numb. def. of חַיָּה.

חַיָּה that this, to the demons. pron. is understood the noun חַיָּה.

חַיָּה חַיָּה he had spoken; חַיָּה in this place assists in forming the pluperfect tense of the verb חַיָּה, §. 38.

חַיָּה חַיָּה, see ver. 11.

חַיָּה which he had said, this verb denotes the pluperfect tense in this place.

23. חַיָּה חַיָּה was, the subst. verb being joined to חַיָּה with its affixes, the imperf. tense is formed, §. 34.

חַיָּה feast, masc. noun def. state, root Arab. عَاد he visited, second conj. عَاد he feasted.

חַיָּה many, adj. plu. numb. def., from the verb חַיָּה he multiplied.

חַיָּה when they had seen; חַיָּה has here the signification of when. See Schaaf's Lexicon under this letter.

24. חַיָּה חַיָּה But Jesus himself, see §. 55.

1) $\text{לֹא־} \text{אֶתְּ} \text{לֹא־} \text{אֶתְּ} \text{לֹא־} \text{אֶתְּ} \text{לֹא־} \text{אֶתְּ}$ *trusted not himself*
to them; לֹא־ is joined to the part., and makes the
 imperf. tense of the verb אֶתְּ Aph. conj. לֹא־ gives
 the verb a reciprocal sense, §. 56, p. 114.

לֹא־ *because*. Etsotso has not here its usual accom-
 panying letter Vau, §. 2.

$\text{לֹא־} \text{אֶתְּ}$ *he knew*, imperf. tense of the verb אֶתְּ .

25. $\text{לֹא־} \text{אֶתְּ}$ *he needed*, imperf. tense, Peal
 conj. of the verb אֶתְּ .

לֹא־ *should testify*. Optative and subjunc. expres-
 sions are frequently expressed by the future tense,
 §. 56; the vowel Pethocho is put under אֶתְּ because in
 the præter. this letter has Revotso.

The SCRIPTURAL CHARACTER of the ENGLISH CHURCH. By the Rev. D. COLERIDGE, M.A., Principal of St. Mark's College, Chelsea. Octavo, 12s. 6d.

The series of Sermons, bearing the above title, were written exclusively for perusal, and are arranged as a connected whole. The Author has adopted this form to avail himself of the devotional frame of mind, presupposed on the part of the reader, in this species of composition; but he has not deemed it as necessary to preserve with strictness the conventional style of the pulpit, for which these discourses were never intended: they may, consequently, be taken as a series of Essays, or as the successive chapters of a general work.

Paul's in the time of James I. and Charles I. With a Memoir. By **HENRY
ALFORD**, M.A., late Fellow of Trinity College, Cambridge. Six Volumes,
Octavo, with a fine Portrait. 3l. 12s.

We cannot forbear repeating Mr. Coleridge's question, "Why are not Donne's
Volumes of Sermons reprinted at Oxford?" Surely the character of some of his
juvenile poems cannot be the reason. Donne's Life is placed in a cheap form in the
Catalogue of the Society for Promoting Christian Knowledge, and deservedly so, in
every respect. Why does Oxford allow one hundred and thirty Sermons of the
greatest preacher, at least of the seventeenth century—the admired of all hearers, to
remain all but totally unknown to the Students in Divinity of the Church of England,
and to the literary world in general? *Quarterly Review*, vol. Lix. p. 6.

The Psalter; or, Psalms of David,
in Metre, with APPROPRIATE TUNES. Edited by
JOHN HULLAH.

This Work is preparing for publication on the same plan as the Editor's *Part Music*. It will appear in separate Parts, for the different Voices, as well as in Score; besides which, there will be a Folio Edition, with a compressed Accompaniment for the Organ or Piano-Forte.

Of the separate Voice Parts and the Score, *Cheap Editions* will be issued, in order that a UNIFORM VERSION of the *Psalter, with Music*, may be brought within the reach of even the humblest classes of society.

Part Music, edited by JOHN HULLAH.

HULLAH'S PART MUSIC is Published Monthly, in SCORE and in SEPARATE VOICE PARTS; each Monthly Number containing an equal portion of Sacred and Secular Music.

CLASS B., MUSIC in SCORE for the VOICES of WOMEN and CHILDREN. Price 8d.

CLASS C., MUSIC IN SCORE for the VOICES of MEN. Price 8d.

A new Number of each of the Classes B. and C., is published every second Month, alternately with CLASS A.

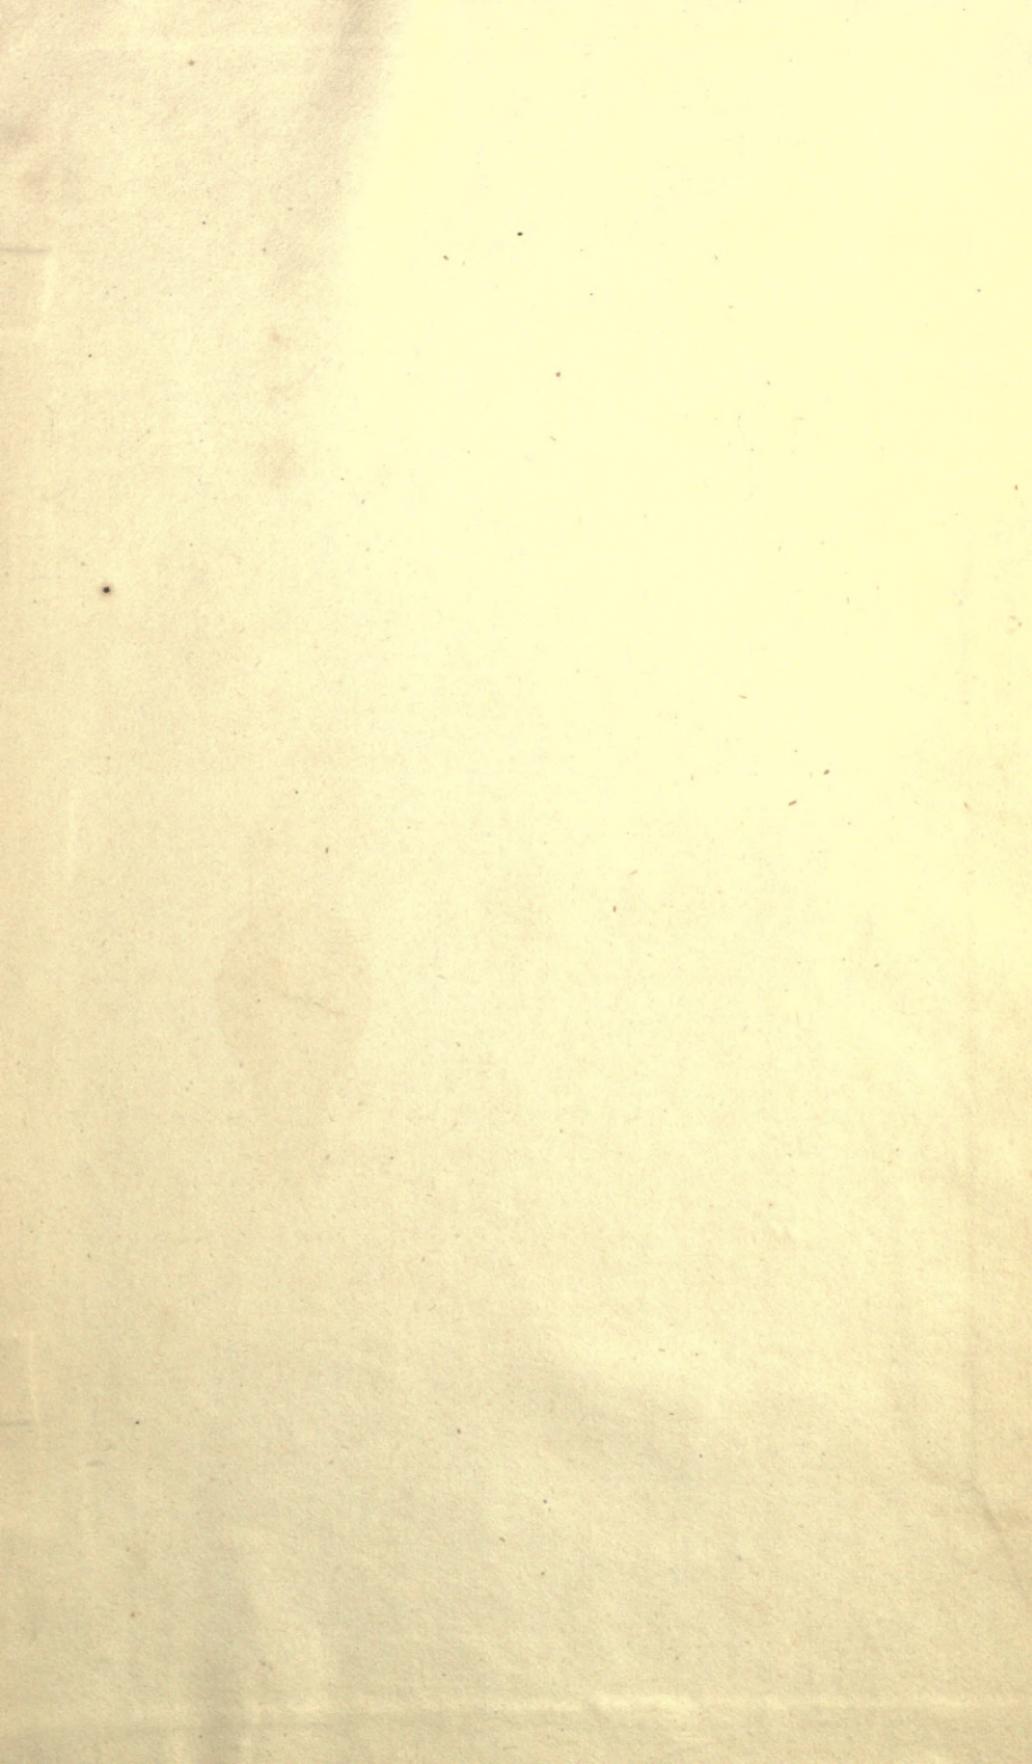

CLASS A., SACRED MUSIC for FOUR VOICES. The Score, bound and lettered, price 9s. The Separate Voice Parts, (Soprano, Alto, Tenor, and Bass,) 3s. each, bound and lettered.
